POS

5520m²

Timber knee rail to help protect roadside Raingarden / wildflower meadow areas

Timber knee rail to help protect wildflower meadow areas

Continuous cover provided by native shrub species mix to encourage foraging badgers across the site

Wildflower species rich grassland with different mowing regimes

larger boulders and stones upstream of weir structure

riffle bed structure to help slow water flow

boulder / rocks salvaged during earthworks

timber weir to help slow water flow rate

timber weir with notch specified by engineer

pedestrian footbridge using composite non-slip 'timbers'

Managment of mowing regimes to be relaxed to encourage biodiversity of wetland vegetation and invertebrates in swale

Detention basin size to be confirmed by engineers

New Wildlife Pond

+134.35

+134.50

Proposed wildlife corridor / swale feature
