**Waste & Storage Collection**

4x Large waste bins will be provisioned for the disposal of waste and these will be sourced from a local contractor that will also be employed to empty these at regular intervals (weekly or fortnightly). If additional bins are required then more will be provisioned as per needs. Silt traps and the interceptor will be emptied and cleaned by a licensed contractor every 2-3 months All arisings from the washing process, guard hut and speedyfit building will be recycled where possible. All collections of the same will be carried out by licensed contractors. As for P1 Speedyfit's removal of old tyres and discarded oils etc. These will be securely stored internally and regularly cleared by a licensed contractor.

**Trade Effluent**

Trade waste is limited to the arisings from the cleaning of vehicles inside and out, this is mainly the silt traps under the wash bays, the three-stage interceptor plus dust and detritus from the vacuuming process. All wash bays have integral silt traps which will be regularly emptied by a contractor as required. All arisings from the washing process and use of the amenity building etc will be recycled where possible.
