

# Wildlife Don’ts

**Don’t ignore your responsibilities regarding wildlife on the site. If you are not sure please ask.**

**If a Great Crested Newt is found on site do not re-start work until David Hughes (☎ 07719969345) has confirmed it is ok to do so.**

**If a Grass Snake is found on site do not re-start work until David Hughes (☎ 07719969345) has confirmed it is ok to do so.**

**Do not handle any Grass Snakes.**

**Don’t create piles of materials (spoil/ rubble, etc) that Great Crested Newts could hide beneath.**

**Don’t leave holes on site overnight – either fill them in or put a plank of wood in the hole so that newts can get out.**

**Do not leave harmful substances uncovered.  Badgers are strong and able to push over small storage drums.**

**Block up any other materials that Badgers might access overnight.**

**Don’t work outside any temporary fence as it has been installed to protect wildlife.**

**When moving large/ heavy items (that have been on site overnight) they should be lifted vertically - do not drag them along the ground.  Once the item is lifted, and when safe to do so, check beneath for any Great Crested Newts.**
