6. **Management and maintenance.**
Any information on the long term management and maintenance of the enhancements.

After the end of each breeding season, nestboxes should be taken down (were possible) and the old nesting materials removed, and the box should be scalded with boiling water to kill any parasites. Do **not** use insecticides or flea-powders - boiling water is adequate. Annual cleaning is best carried out at the end of the breeding season from late September to February.

7. **Conclusion**
Based on the information provided above, this development will result in a **Green Infrastructure and Net Biodiversity Benefits**upon completion.

8. **Sketch plan**(Insert plan showing the features of the development site):
