Dear Alan Wells,

Thank you for re-consulting NRW regarding the submission of information relating to bat mitigation and compensation. As this is a lower risk case for bats, we consider that the development is not likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in its natural range. We therefore advise that you liaise with your Authority's ecologist on the suitability of the proposed mitigation and compensation.

If you have any queries please do not hesitate to contact me.

Kind Regards
Garmon Lewis
