Date: 07 January 2025

Dear Sir/Madam,

PROPOSAL: ERECTION OF DOUBLE GARAGE AND FORMATION OF NEW VEHICULAR ACCESS

LOCATION: 39 CLIFTON AVENUE, BRYMBO, WREXHAM, LL11 5FS

Thank you for consulting Cyfoeth Naturiol Cymru (CNC)/Natural Resources Wales (NRW) about the above, which we received on 24 December 2024.

We have no objection to the proposed development as submitted and provide the following advice.

Protected Sites
Foul drainage
We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). In line with our *Advice to Planning Authorities for Planning Applications Affecting Nutrient Sensitive River Special Areas of Conservation* (28 June 2024), under the Habitats Regulations, Planning Authorities must consider the impact of proposed developments on water quality within SAC river catchments.

However, recognising the specific nature of the application submitted a double domestic garage with no foul drainage. we are satisfied that there is unlikely to be a source of additional nutrients and a pathway for impacts. As such, in our opinion, it would be reasonable for your Authority to screen out this proposal as not likely to have a significant effect on the River Dee and Bala Lake SAC in relation to nutrient inputs.

Protected Species
No ecological information has been submitted in support of this application. We recommend you seek the advice of your Authority's ecologist about the requirement for further information to be submitted in support of the application, and to scope the need for bespoke surveys, where required

Landfill

According to our records the proposed development site is located near to land that is, or has been, used for the deposition of waste material. We would therefore advise you to consult with the local authority's Environmental Health and Building Control Departments, as they may hold detailed records, and may wish to make appropriate recommendations in respect of landfill gas investigation/remedial work. The developers should be made aware of the existence of the landfill site(s) so that they can decide whether or not to make their own investigations into the presence of landfill gas. It should also be noted that Waste Management Paper 27 states "It has been found that many sites which have taken only supposedly 'inert' waste have produced gas".

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our website. We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our website for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yours faithfully,

Ruth Prichard
