To Whom it may concern

Re – Torriad Farms Ltd, Bowling Bank, Wrexham, LL13 9RT

The replacement heifers housed at Torriad Farm and off site are all bedded on straw, so no slurry is produced. The resulting Farm Yard Manure (FYM), is put in temporary field heaps, and spread on the land when ground conditions allow, which is in line with the regulations defined in the Water Resources (Control of Agricultural Pollution) (Wales) Regulations 2021 (CoAPR).

The intention is for future replacement heifer sheds at Torriad Farm to be straw bedded and hence FYM will be produced and stored/spread on the land as per the above.

Yours faithfully

N. Blackburn
