Date Received 31/10/2024

Decision Date 03/02/2025

1. The development hereby permitted shall be commenced before the expiry of five years from the date of this permission.

2. The development shall only be carried out in strict accordance with the details shown on the following plan(s) and document(s): A001, A003 Rev C, A301 Rev A, A103 Rev A, A102 Rev A and A101 Rev B.

3. The development hereby permitted shall not be occupied until the measures to deliver net benefit for biodiversity (NBB) shown on A300 Rev C and within the Green Infrastructure Statement revA have been implemented in full. The measures shall thereafter be maintained for the lifetime of the development.

Reason(s)

1. To comply with Section 91(3) of the Town and Country Planning Act, 1990.

2. To comply with Section 91(3) of the Town and Country Planning Act, 1990.

3. To ensure the development delivers net benefit to biodiversity in accordance with paragraph 6.4.5 of Planning Policy Wales 12.

Note(s) to applicant

The proposed development lies within an area that has been defined by the Coal Authority as containing coal mining features at surface or shallow depth. These features may include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and former surface mining sites. Although such features are seldom readily visible, they can often be present and problems can occur, particularly as a result of new development taking place.

In pursuance of its powers under the Acts an Orders referred to below, the County Borough Council as Local Planning Authority, hereby determines your application in accordance with the particulars and plans comprising the application

Date Received 31/10/2024

Decision Date 03/02/2025

Any form of development over or within the influencing distance of a mine entry can be dangerous and raises significant land stability and public safety risks. As a general precautionary principle, the Coal Authority considers that the building over or within the influencing distance of a mine entry should be avoided. In exceptional circumstance where this is unavoidable, expert advice must be sought to ensure that a suitable engineering design which takes into account all the relevant safety and environmental risk factors, including mine gas and mine-water. Your attention is drawn to the Coal Authority Policy in relation to new development and mine entries available at:
www.gov.uk/government/publications/building-on-or-within-the-influencing-distance-of-mine-entries

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Coal Authority Permit. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Failure to obtain a Coal Authority Permit for such activities is trespass, with the potential for court action.

If any coal mining features are unexpectedly encountered during development, this should be reported immediately to the Coal Authority on 0345 762 6848. Further information is available on the Coal Authority website at:
www.gov.uk/government/organisations/the-coal-authority
