Your Ref: P/2024/1591

Dear Sir/Madam

Grid Ref: SJ278432 327880 343322
Site: Sports And Social Club, Bethania Road, Acrefair, Wrexham
Development: Change of use of land and installation of outdoor seating area including erection of outdoor pods and creation of children's play area.

We refer to your planning consultation relating to the above site, and we can provide the following comments in respect to the proposed development.

Firstly, with respect to the submitted application form and accompanying plans, we acknowledge that the development proposes to discharge foul and surface water flows to the existing foul drainage system and water course respectively. The development is partly in retrospect and includes a limited only increase in existing employment numbers.

FOUL WATER

The proposed development site is located in the catchment of a public sewerage system which drains to Cefn Mawr Wastewater Treatment Works (WwTW) and ultimately discharges to a river Special Area of Conservation (SAC). We have considered the impact of foul flows generated by the proposed development and concluded that flows can be accommodated within the immediate public sewerage system, whereas the WwTW has a phosphorus consent limit in place and is currently failing to comply with the 95% quartile for its flow passed forward (FPF) performance, at the time of this consultation. Notwithstanding this, in line with the environmental regulator's National Environment Programme, we are required to deliver a scheme at the WwTW to ensure 95% quartile compliance with our FPF performance.

SURFACE WATER

Turning to surface water drainage, as of 7th January 2019, this proposed development is subject to Schedule 3 of the Flood and Water Management Act 2010. The development therefore requires approval of Sustainable Drainage Systems (SuDS) features, in accordance with the 'Statutory standards for sustainable drainage systems – designing, constructing, operating and maintaining surface water

drainage systems'. In this instance, we offer no objection to proposals for disposal of surface water flows into a surface water body, in principle, subject to consultation and agreement with the regulatory body or riparian owner of this system.

We would request that if you are minded to grant Planning Consent for the above development that the **Conditions and Advisory Notes** provided below are included within the consent to ensure no detriment to existing residents or the environment and to Dwr Cymru Welsh Water's assets.

Conditions

No surface water and/or land drainage shall be allowed to connect directly or indirectly with the public sewerage network

Reason: To prevent hydraulic overloading of the public sewerage system, to protect the health and safety of existing residents and ensure no pollution of or detriment to the environment

Advisory Notes

The applicant is also advised that some public sewers and lateral drains may not be recorded on our maps of public sewers because they were originally privately owned and were transferred into public ownership by nature of the Water Industry (Schemes for Adoption of Private Sewers) Regulations 2011. The presence of such assets may affect the proposal. In order to assist us in dealing with the proposal the applicant may contact Dwr Cymru Welsh Water. Under the Water Industry Act 1991 Dwr Cymru Welsh Water always has rights of access to its apparatus.

In accordance with Planning Policy Wales (Edition 12) and Technical Advice Note 12 (Design), the applicant is advised to take a sustainable approach in considering water supply in new development proposals, including utilising approaches that improve water efficiency and reduce water consumption. We would recommend that the applicant liaises with the relevant Local Authority Building Control department to discuss their water efficiency requirements.

As of 7th January 2019, this proposed development is subject to Schedule 3 of the Flood and Water Management Act 2010. The development therefore requires approval of Sustainable Drainage Systems (SuDS) features, in accordance with the 'Statutory standards for sustainable drainage systems – designing, constructing, operating and maintaining surface water drainage systems'. It is therefore recommended that the developer engage in consultation with Wrexham County Borough Council, as the determining SuDS Approval Body (SAB), in relation to their proposals for SuDS features. Please note, Dwr Cymru Welsh Water is a statutory consultee to the SAB application process and will provide comments to any SuDS proposals by response to SAB consultation.

Our response is based on the information provided by your application. Should the proposal alter during the course of the application process we kindly request that we are re-consulted and reserve the right to make new representation.

If you have any queries please contact the undersigned on 0800 917 2652 or via email at **developer.services@dwrcymru.com**

Please quote our reference number in all communications and correspondence.

Yours faithfully,

Shan Wyn Jones
