Wrexham County Borough Council
The Guildhall
Wrexham
LL11 1AY

Date: 04 July 2024

Dear Sir/Madam,

PROPOSAL: ERECTION OF 5 DWELLINGS

LOCATION: FORMER AIR PRODUCTS SITE, LLANGOLLEN ROAD, ACREFAIR, WREXHAM, LL14 3HP

Thank you for consulting Cyfoeth Naturiol Cymru (CNC)/Natural Resources Wales (NRW) about the additional information regarding the above, which we received on 01 July 2024.

We continue to have concerns with the application as submitted because inadequate information has been provided in support of the proposal. To overcome these concerns, further consideration is required regarding foul drainage. Further details are provided below.

Protected Sites – Foul Drainage

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). In line with our [Advice to Planning Authorities for Planning Applications Affecting Nutrient Sensitive River Special Areas of Conservation \(28 June 2024\)](#), under the Habitats Regulations, Planning Authorities must consider the impact of proposed developments on water quality within SAC river catchments.

This application for the erection of 5 dwellings proposes connection of foul water to the mains sewer. Ultimately, the suitability of foul drainage arrangements for the proposed development is a matter for your Authority to determine. However, we are satisfied that our concerns can be overcome by your Authority following our [Advice](#) specifically the section titled '*What does this mean for development proposals involving connection to public wastewater treatment works?*'

We therefore advise you to take the above into account in your determination of whether the development is likely to have a significant effect on the SAC. Should you determine that an Appropriate Assessment is required, the Applicant will then need to submit whatever

evidence they deem appropriate (seeking advice from consultants as may be necessary) to demonstrate no adverse effect on site integrity.

Protected Species

We note that there is no information about protected species with the application and, therefore, are assuming that your Authority has screened the application and concluded that there is not a reasonable likelihood of protected species being present.

Landfill

According to our records the proposed development site is located near to land that is, or has been, used for the deposition of waste material. We would therefore advise you to consult with the local authority's Environmental Health and Building Control Departments, as they may hold detailed records, and may wish to make appropriate recommendations in respect of landfill gas investigation/remedial work. The developers should be made aware of the existence of the landfill site(s) so that they can decide whether or not to make their own investigations into the presence of landfill gas. It should also be noted that Waste Management Paper 27 states "It has been found that many sites which have taken only supposedly 'inert' waste have produced gas".

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yours faithfully,

Ruth Prichard
