

No.1: This is the area we will use as the waiting/ reception room, we have placed laminate flooring on top of the concrete, and the walls are made from studded timber.

No.2 & 3: These are the play/exercise areas for the dogs, these have been designed to feel like the dog is outdoors, with artificial grass, this has not been attached to the floor only placed, this way we can remove whenever necessary and clean without any issues. The walls for this have been created from recycled pallets.

No.4: The groomers, this was built from studded timber to divide the room from the kennels and reception. This groomer's is solely for customers who book their dogs in for the day.

No.5: The kennels, these have been designed using timber, and recycled pallets for doors, the floor has not been changed and remains as concrete.

No.6: This area will be used for customer parking, this is a large open spacing meaning the customers can maneuver safely, and always be in a forward gear. This area has not been changed, it has been tidied up and the flooring has remained the same, No trees in the area have been affected and will remain the same.

Below is the signed agreement dated 28/11/2023,
for full permission to use the proposed barn.
