Date: 06/12/2022
Our Ref: PPA0007374

Dear Sir/Madam,

site address: Land North of Bryn Lane, Wrexham

development: request for an eia scoping opinion land north of bryn lane wrexham industrial estate

I refer to your pre-planning enquiry received relating to the above site, seeking our views on the capacity of our network of assets and infrastructure to accommodate your proposed development. Having reviewed the details submitted I can provide the following comments which should be taken into account within any future planning application for the development.

It is unlikely that sufficient capacity exists to accommodate the proposed development without causing detriment to the existing services we provide to our customers, or in regard to the protection of the environment. There are no planned reinforcement works within Dwr Cymru Welsh Water's Capital Investment Programme and therefore, at this stage, we are unable to provide you with a point of adequacy on the network.

As part of the environmental statement, we would expect that foul and surface water drainage is detailed, in conjunction with any impacts to Welsh Water Dwr Cymru assets.

I trust the above information is helpful and will assist you in forming water and drainage strategies that should accompany any future planning application. making connections to our systems and ensuring any existing public assets or infrastructure located within new development sites are protected.

Please note that our response is based on the information provided in your enquiry and should the information change we reserve the right to make a new representation. Should you have any queries or wish to discuss any aspect of our response please do not hesitate to contact our dedicated team of planning officers, either on 0800 917 2652 or via email at developer.services@dwrcymru.com

Please quote our reference number in all communications and correspondence.

Yours faithfully,

Owain George
Planning Liaison Manager
Developer Services

Please Note that demands upon the water and sewerage systems change continually; consequently the information given above should be regarded as reliable for a maximum period of 12 months from the date of this letter.
