## 1 INTRODUCTION

### 1.1 The Scheme

- 1.1.1 Etive Ecology Ltd was commissioned by Innova Renewables Development to undertake an ecological appraisal of the proposed cable route corridor on land north of Bronwylfa Road, Wrexham. The application site is centred on National Grid References SJ 29780 48610.
- 1.1.2 The applicant is applying for full planning permission for the installation of an Energy Storage System, including energy storage units, substation, site access, cable connection, landscaping and ancillary infrastructure. A PEA and relevant bat surveys have been carried out for the main footprint of the scheme. This PEA has been prepared for three proposed cable corridor routes to link the new development to the existing grid at Legacy Substation.

### 1.2 Scope of this Report

- 1.2.1 The ecological appraisal of the proposed scheme is broadly based upon the *Guidelines for Preliminary Ecological Appraisal* (Chartered Institute of Ecology and Environmental Management, 2017).
- 1.2.2 The aim of the assessment is to obtain information on the existing ecological composition and value of the site, and to conduct a preliminary assessment of the likely significance of ecological impacts. To achieve this, the following steps were taken:
- The field survey area and the 'zone of influence' of the scheme, have been identified.
  - A desk study has been undertaken using freely available resources and a data request made to Cofnod.
  - Baseline information on the site and surrounding area has been recorded through an 'extended Phase 1 survey', including a Phase 1 habitat survey (JNCC 2010) and consideration of notable and/or protected habitats and species (IEA 1995).
  - The ecological features found to be present have been evaluated (CIEEM, 2019) .
  - Invasive plant and animal species (such as those listed on Schedule 9 of the Wildlife & Countryside Act [WCA]) have been identified.
  - Potential constraints to the proposed development and any ecological impacts arising from the development have been identified .
  - Recommendations for further survey have been made, where appropriate.
  - Mitigation recommendations have been provided based on current information.
- 1.2.3 A Phase 1 Habitat Map of the survey area is presented in **Appendix A**. Target notes are marked on the Phase 1 Habitat Map and are used to link the report text to locations on site. Photographs taken during the survey are presented in **Appendix B**. Biological Records are found in **Appendix C**.

## 2 METHODOLOGY

### 2.1 Desk Study

2.1.1 A desk study was undertaken to identify any nature conservation sites within 1km of the site. The desk-based exercise also considered the potential for protected and/or notable species of fauna to be found within 2km of the site.

2.1.2 The following sources of information were utilized:

- MAGIC website (<http://www.magic.gov.uk/MagicMap.aspx>)
- Wrexham County Council website (<http://www.wrexham.gov.uk>)
- Natural Resources Wales website (<https://naturalresources.wales/>)
- Wales Biodiversity Partnership (<https://www.biodiversitywales.org.uk/>)

2.1.3 A data search enquiry was made to the North Wales Environmental Information Service – COFNOD. The enquiry was a standard search for all nature conservation sites and all legally protected and notable species within a 2km radius of the centre of the site. The results of this data search have been presented within this report.

### 2.2 Extended Phase 1 Habitat Survey

2.2.1 The initial site visit was made on the 20<sup>th</sup> September 2023.

2.2.2 The survey comprised an extended Phase 1 Habitat Survey. This survey method follows the habitat assessment and classification procedure outlined by the Handbook for Phase 1 Habitat Survey (JNCC, 2010), whereby all habitats are identified, described and mapped using a standard classification.

2.2.3 The extended component of the survey is developed from the methodology described in Guidelines for Baseline Ecological Assessment (IEA, 1995). All habitats and features within the survey area are assessed for their potential to support legally protected or notable species (nationally or locally).

2.2.4 These species include:

- **Amphibians:** ponds within 250m of the site were considered for their suitability to support a range of amphibians, including great crested newts (GCN).
- **Reptiles:** the site was assessed for suitable habitats including rough grassland, cloddiau, brownfield sites and habitat edges in general which would provide cover, basking and foraging habitat for reptile species.
- **Otters:** watercourses within 100m of the site were checked for signs of otter and assessed for their suitability to support the species.
- **Water voles:** watercourses on site were checked for signs of water vole presence and assessed for their potential to support the species.
- **Bats:** all trees and structures on site were assessed as to their suitability to support roosting bats at any point during the year. Trees and structures were then categorised for their potential to support roosting bats as per the *Bat Surveys for Professional Ecologists – Good Practice Guidelines* (Collins, J., 2016).
- **Birds:** the site was assessed for suitable habitats for nesting birds, including habitats suitable for ground-nesting species.

- **Badgers:** all habitats within 30m of the site were surveyed where possible to identify the presence of any setts or signs of badger activity.
- **Invasive plant species:** this assessment does not constitute a full Schedule 9 species survey. The potential for any Schedule 9 species was assessed and any species that were encountered were mapped and noted.

## 2.3 Assessment of Ecological Value

2.3.1 The value and sensitivity of ecological features was determined based on the guidance given in *Guidelines on Ecological Impact Assessment* (CIEEM, 2019). Individual ecological receptors (habitats and species that could be affected by the development) were assigned levels of importance for nature conservation in one of the following categories:

- International
- UK
- National
- County
- District;
- Local, or
- within the immediate zone of influence or site only.

2.3.2 For a given receptor, determination of value includes consideration of the size, secondary or supporting value/function, conservation status and quality of the species or feature.

## 2.4 Limitations

2.4.1 The initial Phase 1 Habitat Survey was taken within the recommended survey season. Given the current land use and management of the site it was also possible to classify all habitats and identify the majority of species present.

2.4.2 It is concluded that there were no significant constraints posed to the undertaking of the Phase 1 Habitat Survey of the site. The survey findings and associated impact assessment are therefore considered reliable and robust.

### 3 RESULTS

#### 3.1 Desk Study

##### Designated Sites

- 3.1.1 There are no statutory sites for nature conservation within <1km of the application site.
- 3.1.2 There are five non-statutory sites for nature conservation within <1km of the application site all designated as Local Wildlife Sites (LWS):
- Legacy Substation: (on site) This site is designated for its range of habitats including scrub, semi-improved grassland and semi-natural broadleaved woodland. Notable species present include bee orchid, yellow-wort, and common centaury.
  - Pentrebychan Crematorium: (approximately 270m south) This site is designated for its variety of habitats including species-rich neutral semi-improved grassland, broadleaved woodland, parkland and ponds.
  - Bronwylfa Wood: (approximately 630m west) This site is designated for its semi-natural broadleaved woodland with areas of conifer plantation dominated by sycamore that runs along Pentre Brychan Brook.
  - Nant Mill – Grasslands: (approximately 700m north) This site is designated for its 5.9ha of grassland habitat. No further information is available.
  - Big Wood: (approximately 1km north) This site is designated for its range of woodland habitat dominated by sycamore, beech and conifer plantation.

##### Species Records

- 3.1.3 A full list of the species records within 2km of the site is provided in **Appendix C**. Below is a summary of these species records:
- Amphibians; great crested newt
  - Bats; various bat species including brown long-eared, common pipistrelle, lesser horseshoe bat, noctule, soprano pipistrelle and whiskered bat.
  - Birds; various bird species including bullfinch, curlew, grasshopper warbler, herring gull, lapwing, marsh tit, reed bunting, song thrush and yellowhammer.
  - Invertebrates; various invertebrate species including autumnal rustic, buff ermine, dingy skipper, feathered gothic, grey dagger, rosy minor and small square-spot.
  - Mammals; badger, hedgehog and polecat.
  - Riparian mammals; otters.
  - INNS; Himalayan balsam, Japanese knotweed.

##### Environment (Wales) Act 2016

- 3.1.4 Section 7 of the Act replaced the 'Biodiversity duty' in Section 40 of the Natural Environment and Rural Communities (NERC) Act 2006, which requires all public bodies to have regard to biodiversity conservation when carrying out their functions. This is commonly referred to as the 'Biodiversity duty'.
- 3.1.5 The Section 7 list is now used to identify those habitats and species of Principal Importance in Wales under the Environment (Wales) Act. The following relevant habitats and species are found on this list:

**Table 3.1.1 Relevant Section 7 Habitats/Species**

| Habitats                         | Species                |
|----------------------------------|------------------------|
| Hedgerow                         | Badger                 |
| Lowland mixed deciduous woodland | Great crested newt     |
| Pond                             | Hedgehog               |
|                                  | Polecat                |
|                                  | Otter                  |
|                                  | Various bat species    |
|                                  | Various bird species   |
|                                  | Various insect species |

### 3.2 Extended Phase 1 Habitat Survey

- 3.2.1 The walkover survey was undertaken by Russell Grey (CEnv, BSc, CIEEM) and Sophie Frost (BSc, Grad CIEEM). The survey was undertaken on a cloudy day with light rain and temperatures around 18°C, and no constraints to the survey of any part of the red line application site.
- 3.2.2 The proposed cable corridor routes are situated within an area dominated by agricultural fields and hedgerows. A former railway embankment runs between the proposed cable routes, dominated by semi-natural broadleaved woodland. Mixed semi-natural woodland surrounds the existing Legacy Substation to the west. The B5097 (Bronwylfa Road) forms the southern boundary of the surveyed area and a country lane marks the eastern and northern survey boundaries. Cadwgan Hall is located within the survey area, near to the northern corridor. Minor water-courses are located adjacent to the northern corridor and ~200m to the south of the surveyed area. There are three ponds located within <250m of the proposed cable corridor routes, two within the Substation boundary and one 120m to the south.

#### Habitats

- 3.2.3 The habitats within the proposed cable routes and surrounding land are described within **Table 3.2.1** below which references target notes that are marked on the Phase 1 Habitat Map (**Figure 1**).

**Table 3.2.1 Target Notes**

| Target Notes | Habitat Description                                                                                                              | Vegetation Species                                                                                                                                                            |
|--------------|----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1</b>     | Mature <u>species-rich hedgerow</u> .                                                                                            | <b>Plant sp.;</b> bracken, dock hogweed, nettle, lords and ladies<br><b>Hedgerow sp.;</b> ash, blackthorn, bramble, elder, field maple, hawthorn, hazel, holly, oak, sycamore |
| <b>2</b>     | <u>Improved grassland</u> .                                                                                                      | <b>Plant sp.;</b> broadleaved dock, perennial ryegrass, white clover                                                                                                          |
| <b>3</b>     | Two mature <u>broadleaved trees</u> (oak) in hedgerow – Both DBH 60cm, height 10-12m and <b>High Bat Roost Potential (BRP)</b> . | <b>Tree sp;</b> oak                                                                                                                                                           |
| <b>4</b>     | Species-rich hedgerow.                                                                                                           | <b>Plant sp.;</b> ivy<br><b>Hedgerow sp.;</b> ash, blackthorn, dogrose, elder, hawthorn, hazel                                                                                |

| Target Notes | Habitat Description                                                                                                                         | Vegetation Species                                                                                                                                  |

3.2.4 The habitats within the red line boundary of the northern cable corridor include hardstanding and improved grassland (**TN9** and **TN16**).

3.2.5 The habitats within the red line boundary of the southern cable corridor include improved grassland (**TN9**, **TN16**, **TN26**, and **TN29**), semi-natural broadleaved woodland (**TN7**), native species-rich hedgerow (**TN11** and **TN18**) and fencing (**TN21**).

### Protected Species

3.2.6 The following text summarises the suitability of the survey area to support various legally protected species, based on the descriptions provided in the above target notes.

#### Amphibians

3.2.7 The majority of the terrestrial habitats within the site boundary are largely unsuitable for amphibians, including great crested newts, due to the active farmland management and cattle grazing regime throughout the improved grasslands. However, the semi-natural broadleaved woodland and hedgerows provide shelter and dispersal opportunities for amphibians.

3.2.8 There is no aquatic habitat within the red line boundaries. The two ponds within the Substation boundary could not be accessed as they are on private land but were assessed as being “average” and “below average” during a previous PEA (Avian Ecology Ltd 2021). A pond is located approximately 120m south of the site but is separated by Bronwylfa Road and is a man-made reservoir and as such not suitable for great crested newts.

3.2.9 There was no evidence of amphibians during the walkover survey. Great crested newts have been confirmed present in the ponds located inside the Legacy Substation LWS, as well as in ponds located >250m from the cable routes.

3.2.10 In conclusion, due to the small amount of suitable habitat for amphibians, suitable ponds within 250m of the application site, and confirmed records of GCN <250m of the site, GCN are likely present within suitable habitat inside the red line site boundary.

### Badgers

- 3.2.11 The terrestrial habitat within the proposed site provides low value commuting and foraging habitats within the hedgerows and semi-mature broadleaved woodland. Although there was no evidence of badgers or badger setts during the walkover survey, on site or <30m, there are numerous records of badgers from 100m of the application site boundary and are likely present within the surrounding agricultural fields. However, the surrounding roads, including Bronwylfa Road to the south of the site, present a significant mortality risk to badgers.
- 3.2.12 Badgers are therefore considered to be present locally and potentially forage within the red line boundary.

### Bats

- 3.2.13 There are a number of mature trees within hedgerows throughout the survey area that intersect the proposed cable route corridors. There are two mature oaks within the species-rich hedgerow in **TN11** and two mature oak, one mature sycamore and one veteran sycamore in **TN30**, all of which have high BRP. Furthermore, the species-rich hedgerows **TN1**, **TN11**, **TN18**, **TN28** and **TN30** are likely to attract a large volume of invertebrates providing foraging habitat as well as commuting routes within the local landscape. The broadleaved woodland also provides high value commuting and foraging habitat for bats, with the broadleaved woodland to the south intersecting the proposed south cable corridor route (**TN7**).
- 3.2.14 There was no evidence of bats within the walkover survey. However, there are numerous records for bat species including brown-long eared, common pipistrelle, lesser horseshoe bat, myotis sp., noctule and soprano pipistrelle <1km of the site, including records from within the red line boundary. In conclusion, roosting bats may be present within suitable trees and it is likely that the site is used by foraging/commuting bats.

### Birds

- 3.2.15 The improved grassland habitat is likely to be of very low value to nesting birds but the species-rich hedgerows (**TN1**, **TN11**, **TN18**, **TN28** and **TN30**) and broadleaved woodland (**TN7**) intersecting and surrounding the proposed cable route corridors provide nesting opportunities for numerous bird species, as well as attracting insects and berries for foraging birds. Overall, the habitat within the application site is of moderate value to nesting birds at the local scale.
- 3.2.16 No evidence of nesting birds were found during the site walkover survey. However, the data search returned results for various bird species within 1km of the site, including black headed gull, bullfinch, house sparrow, lesser redpoll, lesser spotted woodpecker, linnet, skylark, song thrush and yellowhammer. The closest priority species record is a linnet 200m to the south.
- 3.2.17 In conclusion, the habitat within the application site provides nesting, foraging and sheltering opportunities for birds, and therefore nesting birds are likely present during the nesting season (March to August inclusive).

### Reptiles

- 3.2.18 The surveyed site offers low value foraging and shelter habitats within the hedgerow and broadleaved woodland within the site. The improved grassland and areas of hardstanding surrounding the agricultural buildings north of the site also provide open areas for basking but

are heavily disturbed by farming activities. The surrounding roads however present potential mortality risks to reptiles and deter dispersal between the site into the wider landscape.

- 3.2.19 There was no evidence of reptiles, such a common lizard or grass snake, during the walkover survey. No records of priority reptiles were located <1km of the proposed site. In conclusion, it is unlikely that reptiles are present within the red line boundary.

#### Riparian Mammals

- 3.2.20 There is no aquatic habitat within the application site. The minor water-course to the north of the site is sub-optimal for riparian species such as otters or water vole as it is deemed to be ephemeral. The two ponds located within Legacy Substation could not be accessed but were considered also sub-optimal during the previous PEA (Avian Ecology Ltd) for riparian mammals. The terrestrial habitat within the site present suitable foraging and commuting habitat, but more optimal terrestrial habitat with links to suitable aquatic habitat are available within the wider landscape.
- 3.2.21 There was no evidence of riparian mammals within the walkover survey, and records for otters are present >500m from the proposed site. In conclusion, it is unlikely that riparian mammals are present within the proposed site boundary.

### **3.3 Notable Species**

- 3.3.1 The terrestrial habitat within the site and surrounding environment is of low value to notable species such as hedgehogs and a variety of invertebrate species. It is therefore possible that they are present within the application site boundary. Records for hedgehogs have been identified ~150m to the south and various invertebrate species such as autumnal rustic, dingy skipper, grayling, powdered quaker and small heath have been identified <1km from the site.
- 3.3.2 The broadleaved woodland is considered to offer local wildlife interest and potentially a wide range of flora species, including notables.

### **3.4 Invasive Non-Native Species (INNS)**

- 3.4.1 Cotoneaster sp. was located in the semi-natural broadleaved woodland along the former railway embankment (TN7). Furthermore, Japanese knotweed and Himalayan balsam have been identified >500m of the site.

### **3.5 Key Ecological Receptors**

- 3.5.1 The extended Phase 1 Habitat Survey has identified the following key ecological receptors associated with the site:
- Amphibians; GCN known to be present locally and small pockets of suitable terrestrial habitat are found within the site boundary. *Local Value*.
  - Badgers; known to be present locally and potentially foraging and commuting within the site boundary. *Local Value*.
  - Bats; potential roosting, foraging and commuting habitat within the site boundary. *Local Value*.
  - Nesting birds; there is the potential for various species of breeding birds to use the site for nesting and foraging. *Local Value*.

- Notable species; the site offers low suitability habitat for invertebrates and hedgehogs. *Local Value*.
- INNS; cotoneaster sp. is present immediately adjacent to the site boundary. *Site Value*.

3.5.2 The protected species / ecological receptors not bullet-pointed above are considered to be of *less than local value*.

## **4 DISCUSSION**

### **4.1 Proposed Scheme**

#### **The Development**

- 4.1.1 The proposed scheme is illustrated on **Figure 2**, detailed within the planning application and includes three proposed routes for cable connections between Legacy Substation and the proposed Energy Storage System.
- 4.1.2 It is anticipated that no mature or semi-mature trees will be removed as a result of the cable installation works. Root protection zones will also be avoided wherever possible. Hedgerows will be avoided where possible through the use of directional drilling and/or other trenchless techniques for installation.

### **4.2 Likely Impacts**

#### **Amphibians**

- 4.2.1 The proposed scheme poses a risk of harm, injury and disturbance to any amphibians found within the site boundary. If installation of the new cables is not undertaken in an appropriate manner, there could be an adverse impact on amphibians (including GCN), significant at the local scale.

#### **Badgers**

- 4.2.2 The proposed scheme poses a risk of harm, injury and disturbance to any badgers found within the site boundary. If installation of the new cables is not undertaken in an appropriate manner, there could be an adverse impact on badgers, significant at the local scale.

#### **Bats**

- 4.2.3 Trees with High BRP are located within **TN11** (two oaks) and **TN28** (two oaks and two sycamore). Any works <10m of these trees pose a risk of disturbance to roosting bats and may also adversely impact the tree roots and long-term viability of any bat roost that may be present. There may also be temporary disturbance to foraging/commuting bats as a result of any vegetation clearance undertaken to facilitate the installation of the new cables.

#### **Nesting Birds**

- 4.2.4 The proposed scheme may result in the temporary loss of 5-10m sections of species-rich hedgerow within **TN11** and **TN18** which have the potential to provide foraging and nesting habitats. Other areas of vegetation clearance also pose a risk to harming/disturbing nesting birds during the nesting season.

#### **Notable Species**

- 4.2.5 The proposed scheme may result in the temporary loss of 5-10m sections of species-rich hedgerow within **TN11** and **TN18** which are suitable for hedgehogs. There is also a risk of harm and disturbance during the installation phase.

#### **INNS**

- 4.2.6 The development of the site poses a risk of spreading INNS (cotoneaster sp.) which are located within the broadleaved woodland on site (**TN7**). Other species of INNS are also known to be

present locally. The impact of localised spreading of INNS is potentially significant at a local level.

## 4.3 Recommendations

### Amphibians

4.3.1 To avoid the low risk of impacting amphibians during the installation phase (i.e. where hedgerows or woodland cannot be avoided by trenchless techniques), the following Reasonable Avoidance Measures (RAMs) will be followed to protect them from accidental harm:

- A pre-commencement Toolbox Talk will be delivered to the site personnel working on the installation. This will provide information in relation to GCN identification, ecology and legal status, as well as details and requirements of these RAMs.
- A pre-commencement hand search of areas due for breaking of ground will be undertaken by a GCN licensed ecologist.
- Clearance of ground vegetation, detritus and any other potentially suitable refugia for GCN (such as around mounds, piles of logs, brash, bricks and stones) will be undertaken prior to any installation works.
- Any clearance works described above will be undertaken with care and by hand by a suitable experienced contractor. These works can only take place outside of the hibernation period, i.e. March to October inclusive.
- If any GCN are encountered, works in the area of discovery will cease immediately and an experienced ecologist called for advice. The ponds within the existing Legacy Substation would be a suitable receptor site for any GCN found during works.
- During installation;
  - all materials will be stored off-ground on stillages or pallets.
  - all rubble/spoil/earth arising from works will be skipped or removed from site on a daily basis.
  - any excavations left overnight will either be back-filled and compacted or else covered by plastic sheeting and secured by plywood batons (or similar) to prevent GCN from gaining access.
  - pre-start checks of the working area will be undertaken each morning, looking for GCN.
  - all site workers will be made aware of the potential presence of GCN and an identified sheet will be kept on site in case any of these animals are encountered.

### Badgers

4.3.2 To avoid the low risk of impacting badgers during the installation phase, the following RAMs will be followed to protect them from accidental harm:

- All rubble/spoil/earth arising from works is skipped or removed from site daily.
- Any excavations left overnight will either be back-filled or a mammal ladder will be provided by way of a ramp of earth or a plank of timber, to provide a means of egress to any mammal that enters the excavation.
- Pre-start checks of the working area will be undertaken each morning, looking for any mammals or other species of wildlife.
- All site workers will be made aware of the potential presence of badger, hedgehogs and other wildlife.

### **Bats**

- 4.3.3 It is recommended that the cable route is micro-sited within the corridor to remain at least 10m from all mature and semi-mature trees, so as to avoid direct impact to tree roots and to avoid disturbance impacts to any roosting bats that may be present (e.g. **TN11**, **TN28** and **TN30**).
- 4.3.4 To retain the functionality of the site for foraging / commuting bats directional drilling should be utilised where the proposed cable corridor intersects species-rich hedgerows. If directional drilling cannot be carried out, then hedgerows temporarily lost will be replaced on a like for like basis.

### **Nesting Birds**

- 4.3.5 To ensure that no nesting birds are directly affected by the proposed development, it is recommended that the cable route is installed using directional drilling under any woodland or hedgerow, or other potential nesting bird habitat. If directional drilling cannot be utilised then vegetation clearance should take place outside of the nesting season - March to August inclusive. Where this is not possible, the site should be inspected by a suitably experienced ecologist and confirmed to be free of nesting birds before any clearance work can be undertaken during the nesting bird season.

### **Notable Species**

- 4.3.6 To avoid the low risk of impacting notable species, such as hedgehogs, during the installation phase, the RAM's outlined in section 4.3.2 will be adhered to.

### **INNS**

- 4.3.7 It is recommended that industry standard good practice is followed to ensure that all reasonable precautionary measures are undertaken by all site contractors to prevent the spread or introduction of any INNS onto site during installation works. Where any INNS are found to have been introduced into the working area, eradication will be necessary post-installation.

## 5 CONCLUSION

- 5.1 Etive Ecology Ltd was commissioned by Innova Renewables Development, to undertake an ecological appraisal of land north of Bronwylfa Road, Wrexham. The site is proposed for the installation of a cable corridor route between a new Energy Storage System and Legacy Substation.
- 5.2 The assessment comprised of an Extended Phase 1 Habitat survey, a desk study, an assessment of the likely impacts on the ecological value of the site and recommendations for further survey and/or mitigation measures to be implemented.
- 5.3 A desktop data search identified five non-statutory nature conservation sites <1km of the site (Legacy Substation, Pentrebychan Crematorium, Bronwylfa Wood, Nant Mill and Big Wood). Protected species records for <2km of the site include badger, great crested newt, hedgehog, polecat, otter, and various bat, bird and invertebrate species.
- 5.4 The site is comprised predominantly of agricultural land, hedgerows and woodland. Minor water-courses are located adjacent to the north and 220m to the south. There are three ponds located within <250m of the proposed cable corridor routes, two within the Legacy Substation and one 120m to the south.
- 5.5 The majority of the site comprises agricultural field parcels of improved grassland separated by species-rich hedgerow and hedgerow with trees, with a belt of broadleaved woodland running east to west and further woodland surrounding Legacy Substation. There are also a number of mature scattered trees within the survey area. No evidence of protected species was recorded during the walkover survey, but the site has the potential to support bats (roosting/foraging/commuting), GCN, badgers and nesting birds.
- 5.6 Recommendations include the avoidance of all suitable bat trees and the use of trenchless techniques to avoid valuable habitat with the potential to support protected species such as GCN or roosting bats. This will avoid the need for further survey work. A scheme of RAMs has been provided to avoid harm/disturbance to amphibians, badgers and hedgehogs.
- 5.7 In conclusion, the application site has been found to be primarily of low ecological value but with features potentially suitable to support protected species. However, provided the recommendations given herein are implemented in full, there should be no adverse impacts posed to any ecological receptors or features.

### Important Information

- Use of the data is governed by Cofnod's [Terms & Conditions](#).
- Data marked as confidential or sensitive must not be released into the public domain, with the exception of the Public Version of the PDF report, which has had sensitive information removed or restricted.
- You should not amend any part of the downloaded records.
- Unless otherwise agreed, use of the data is valid until the Expiry Date (24/09/2023).
- Past records of presence of a habitat or species do not guarantee continued occurrence; absence of records does not imply absence of a species, merely that no records are held by Cofnod; Cofnod cannot guarantee the accuracy of supplied data; copyright of records remains with the original recorder.
- The Dataset ID associated with each record can be used to find information about the provenance of the data. See the [Cofnod Metadata](#) page for more information.
- Verification Levels are given for each record and indicate whether the record has been assessed by an expert.
- Please [contact us](#) if you have any questions about using the data or wish to add further Data Users.

### Notes

- Records with 1km, 2km, 5km, 10km or 100km grid references (where present) are highlighted with, for example, (1km) next to the distance to indicate that the distance
- Cofnod Environmental Information Search

should not be considered to be exact given the vague nature of the grid reference.

- Records shown in **bold** typeface are sensitive species records, and some details have been restricted in this public version of the report.

## Verification Levels

- **UA:** Unassessed
- **PC:** Probably Correct
- **KC:** Known Correct
- **NA:** Not Required

## Species Categories

- **All Other Species:** Any species not included in other categories
- **Category 1 Species:** Species with European and/or UK Legal Protection, Section 7 Species or UK BAP Priority Species
- **Category 2 Species:** Global Red List, British Red Data Book, Nationally Rare & Scarce, Welsh Red and Amber Birds & Welsh Red Data Lists, not identified in Category 1
- **Category 3 Species:** Local species not identified under Categories 1 & 2, Locally Important species as specified by local experts

## Abbreviations

**BAP** - UK Biodiversity Action Plan Priority Species, **BDir1** - EU Birds Directive Annex 1 - Birds which are the subject of special conservation measures, **BDir2.1** - EU Birds Directive Annex 2.1 - Birds which may potentially be hunted, **BDir2.2** - EU Birds Directive Annex 2.2 - Birds which may potentially be hunted within certain member states, **Bern2** - Bern Convention on the Conservation of European Wildlife and Natural Habitats, Appendix 2 - Strictly protected fauna species, **Bern3** - Bern Convention on the Conservation of European Wildlife and Natural Habitats, Appendix 3 - Protected fauna species, **Bonn2** - Bonn Convention on the Conservation of Migratory Species of Wild Animals, Appendix 2 - Migratory Species to be the subject of agreements, **CHS2** - The Conservation of Habitats and Species Regulations 2010, Schedule 2 - European Protected Species of Animals, **CHS4** - The Conservation of Habitats and Species Regulations 2010, Schedule 4 - Animals which may not be captured or killed in certain ways, **CITES-A** - Convention on International Trade in Endangered Species, Annex A - Species threatened with extinction, **CITES-B** - Convention on International Trade in Endangered Species, Annex B - Species that may become extinct unless trade is closely controlled, **CITES-C** - Convention on International Trade in Endangered Species, Annex C - Species subject to regulation, **GBNNSIP** - Great Britain Non-native Species Inventory Portal Checklist of Non-native Species, **HDir2** - Habitats Directive, Annex II - Species requiring designation of Special Areas of Conservation, **HDir4** - Habitats Directive, Annex IV - Species in need of strict protection, **HDir5** - Habitats Directive, Annex V - Species where population management is decided by individual countries, **INNS** - Invasive Non-native Species, **LBAP-A** - Anglesey Local Biodiversity Action Plan, **LBAP-C** - Conwy Local Biodiversity Action Plan, **LBAP-D** - Denbighshire Local Biodiversity Action Plan, **LBAP-F** - Flintshire Local Biodiversity Action Plan, **LBAP-G** - Gwynedd Local Biodiversity Action Plan, **LBAP-S** - Snowdonia National Park Authority Local Biodiversity Action Plan, **LBAP-T** - North and Mid Wales Trunk Road Agent Biodiversity Action Plan, **LBAP-W** - Wrexham Local Biodiversity Action Plan, **LI-48[LR]** - Locally Important Species in Vice-County 48: Merionethshire, **LI-48[LS]** - Locally Important Species in Vice-County 48: Merionethshire, **LI-49[LR]** - Locally Important Species in Vice-County 49: Caernarvonshire, **LI-49[LS]** - Locally Important Species in Vice-County 49: Caernarvonshire

Caernarvonshire, **LI-50[LR]** - Locally Important Species in Vice-County 50: Denbighshire, **LI-50[LS]** - Locally Important Species in Vice-County 50: Denbighshire, **LI-51[LR]** - Locally Important Species in Vice-County 51: Flintshire, **LI-51[LS]** - Locally Important Species in Vice-County 51: Flintshire, **LI-52[LR]** - Locally Important Species in Vice-County 52: Anglesey, **LI-52[LS]** - Locally Important Species in Vice-County 52: Anglesey, **LI-VP-50[LS]** - Rare Plant Register for Vice-County 50: Denbighshire (Locally near scarce), **LI-VP-50[LR]** - Rare Plant Register for Vice-County 50: Denbighshire (Locally rare), **LI-VP-50[LS]** - Rare Plant Register for Vice-County 50: Denbighshire (Locally scarce), **LI-VP-51[LR]** - Rare Plant Register for Vice-County 51: Flintshire (Locally rare), **LI-VP-51[LS]** - Rare Plant Register for Vice-County 51: Flintshire (Locally scarce), **LI-VP-52[LR]** - Rare Plant Register for Vice-County 52: Anglesey (Locally Rare), **LI-VP-52[LS]** - Rare Plant Register for Vice-County 52: Anglesey (Locally Scarce), **LI-VP-52[PX]** - Rare Plant Register for Vice-County 52: Anglesey (Possibly or Probably Extinct), **PBA** - Protection of Badgers Act 1992, **RDB-N** - Red Data Book listing (not based on IUCN guidelines) - Notable on IUCN B, **RDB-NR** - Red Data Book listing (not based on IUCN guidelines) - Nationally Rare, **RDB-NS** - Red Data Book listing (not based on IUCN guidelines) - Nationally Scarce, **RL-CR** - IUCN Red List of Threatened Species - Critically Endangered, **RL-DD** - IUCN Red List of Threatened Species - Data Deficient, **RL-EN** - IUCN Red List of Threatened Species - Endangered, **RL-NT** - IUCN Red List of Threatened Species - Near Threatened, **RL-PX** - IUCN Red List of Threatened Species - Possibly Extinct, **RL-VU** - IUCN Red List of Threatened Species - Vulnerable, **S7** - Environment (Wales) Act 2016 (Section 7), **UKBA** - RSPB/BTO Birds of Conservation Concern - Amber list (not based on IUCN criteria), **UKBR** - RSPB/BTO Birds of Conservation Concern - Red list (not based on IUCN criteria), **WBA** - RSPB/BTO Birds of Conservation Concern in Wales - Amber list (not based on IUCN criteria), **WBR** - RSPB/BTO Birds of Conservation Concern in Wales - Red list (not based on IUCN criteria), **WCA1.1** - Wildlife & Countryside Act 1981 Schedule 1.1 - Birds which are protected at all times, **WCA1.2** - Wildlife & Countryside Act 1981 Schedule 1.2 - Birds which are protected during the close season, **WCA5** - Wildlife & Countryside Act 1981 Schedule 5 - Animals which are protected, **WCA8** - Wildlife & Countryside Act 1981 Schedule 8 - Plants which are protected, **WCA9** - Wildlife & Countryside Act 1981 Schedule 9 - Animals and plants which may not be released/planted or allowed to escape/grow in the wild, **WRL-LIDD** - Lichen Red Data List for Wales (Data Deficient), **WRL-RA[NT]** - IUCN Red List Assessment of Amphibians and Reptiles at Great Britain and Country Scale (Near Threatened), **WRL-RU[EN]** - Rust Fungus Red Data List and Census Catalogue for Wales (Endangered), **WRL-TM[DD]** - IUCN compliant Red List for Britain's Terrestrial Mammals (Data Deficient), **WRL-TM[EN]** - IUCN compliant Red List for Britain's Terrestrial Mammals (Endangered), **WRL-TM[NT]** - IUCN compliant Red List for Britain's Terrestrial Mammals (Near Threatened), **WRL-TM[VU]** - IUCN compliant Red List for Britain's Terrestrial Mammals (Vulnerable), **WRL-VP[CR]** - Vascular Plant Red Data List for Wales (Critically Endangered), **WRL-VP[NT]** - Vascular Plant Red Data List for Wales (Near Threatened), **WRL-VP[VU]** - Vascular Plant Red Data List for Wales (Vulnerable)

## Data Description

|                       |                                                                                                                                                                                                                                          |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Distance</b>       | Indicates the distance, in metres, between the grid reference of the record (using the central point of the grid square) and the search location. For any Sensitive Species Records, this should not be released into the Public Domain. |
| <b>Species Name</b>   | Name of the taxon (usually identified to species level) using the binomial system.                                                                                                                                                       |
| <b>Grid Reference</b> | Grid reference based on the Ordnance Survey grid system.                                                                                                                                                                                 |
| <b>Date</b>           | Date on which the record was made. In some cases this might be a date range, or a vague date such as 'Summer 2010'.                                                                                                                      |
| <b>Recorder(s)</b>    | One or more people who made the original observation and recorded it in some way. It may have subsequently been included in a data collation by another person or it may have been submitted to the LERC directly.                       |
| <b>Abundance</b>      | Number of individuals recorded. Where not specified it is assumed that at least one was present.                                                                                                                                         |
| <b>Record Type</b>    | A description of the type of record.                                                                                                                                                                                                     |
| <b>Site Name</b>      | The site name (if one has been supplied). For any Sensitive Species Records, this cannot be released into the Public Domain.                                                                                                             |
| <b>Notes</b>          | Any additional notes about the sighting. For any Sensitive Species Records, this cannot be released into the Public Domain.                                                                                                              |
| <b>Dataset ID</b>     | ID of this dataset. See 'Important Issues' for more details.                                                                                                                                                                             |
| <b>Lists</b>          | Any local, national or international conservation statuses or legal protection which apply to this species and whether it is included in any Local Biodiversity Action Plans. See 'Abbreviations' for more details.                      |
| <b>V</b>              | An indicator showing the level of confidence held in the record's correct identification.                                                                                                                                                |

## Dataset Information

The records in these results are drawn from the following datasets. Use the Dataset ID next to each record to find its dataset.

| Dataset ID   | Title                                                                                                                                                           | Acknowledgements                                               | Type    |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------|---------|
| D0026/030/01 | Records captured from CCW regional files - CCW Files SJ26.3.1 & SJ26.3.2 - SSSI: Buckley Claypits And Commons - Scientific Information - Amphibians - General   | Cyfoeth Naturiol Cymru/Natural Resources Wales                 | Species |
| D0026/279/01 | Records captured from CCW regional files - CCW File M1.1.4.2 - North Wales - Amphibian Survey and Monitoring                                                    | Cyfoeth Naturiol Cymru/Natural Resources Wales                 | Species |
| D0035/002/01 | Vice-County dataset - Reptile records from Denbighshire and Flintshire Vice-counties (50 and 51)                                                                | Mick Brummage (North East Wales Amphibian and Reptile Network) | Species |
| D0045/001/02 | Wales Otter Survey Database - Records from the 3rd and 4th Otter Surveys of Wales (1991 - 2002)                                                                 | Joint Nature Conservation Committee (NBN download, 21/01/2020) | Species |
| D0059/001/03 | North Wales badger records held by Clwyd Badger Group (including some historic data) - CBG Historic sett data                                                   | Clwyd Badger Group (clwydbadgergroup@btinternet.com)           | Species |
| D0059/005/01 | North Wales badger records held by Clwyd Badger Group (including some historic data) - CBG Sett records 2018 onwards                                            | Clwyd Badger Group (clwydbadgergroup@btinternet.com)           | Species |
| D0059/009/01 | North Wales badger records held by Clwyd Badger Group (including some historic data) - Badger road traffic accidents recorded by CBG, imported from spreadsheet | Clwyd Badger Group (clwydbadgergroup@btinternet.com)           | Species |
| D0062/008/01 | Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - All records up to 2018                                          | Ian M Spence (Clwyd Bird Recording Group)                      | Species |
| D0062/010/01 | Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - 2019 records                                                    | Ian M Spence (Clwyd Bird Recording Group)                      | Species |
| D0108/001/03 | Brown Hare records collated by North Wales Wildlife Trust - Brown Hare records                                                                                  | Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust | Species |
| D0120/002/01 | Otter road casualty records maintained by Cardiff University and Environment Agency - 2012 - 2020                                                               | Cardiff University Otter Project                               | Species |
| D0127/001/02 | Historic Vice-County dataset - Butterfly records from Denbighshire and Flintshire Vice-counties (50 and 51)                                                     | Rob Whitehead                                                  | Species |
| D0135/022/01 | Miscellaneous species records by Andrew and Janet Graham - Invertebrate records, mainly from 2021                                                               | Andrew Graham                                                  | Species |
| D0137/001/01 | Great Crested Newt (Triturus cristatus) Sites in Wales                                                                                                          | Cyfoeth Naturiol Cymru/Natural Resources Wales                 | Species |
| D0158/003/01 | Miscellaneous species records held by North Wales Wildlife Trust in a BIORECS recording database. - Full database                                               | Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust | Species |

|              |                                                                                                                                                                                                                                                             |                                                                                              |         |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|---------|
| D0216/001/03 | Miscellaneous species records held by Denbighshire County Council (records to 2004)                                                                                                                                                                         | Cyngor Sir Ddinbych/Denbighshire County Council                                              | Species |
