27th February 2024

Dear Mr Greenland,

PROPOSAL: OUTLINE APPLICATION FOR ERECTION OF DWELLING (ALL MATTERS RESERVED)

LOCATION: GARREG LLWYD, FRONCYSYLLTE, LLANGOLLEN, LL20 7RY

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the further information (Drainage Plan, and HRA Justification, Roger Parry Associates, February 2024) in support of the above, which we received on 8th February 2024.

We have no objection to the proposed development as submitted and provide the following advice.

Foul Drainage and Protected Sites

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales. In line with our [Planning Advice](#) (August 2023), under the Habitats Regulations, Planning Authorities must consider the phosphorus impact of proposed developments on water quality within SAC river catchments. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

However, recognising the specific nature of the application now submitted, i.e. connecting to an existing foul discharge, improving the treatment, and that the discharge will continue to be within the exemption criteria, we are satisfied that it is unlikely to increase the amount of phosphorus entering the catchment. Therefore, we are satisfied that the proposal is not likely to have a significant effect on the River Dee and Bala Lake SAC.

Protected Landscape

The development site lies within the Clwydian Range and Dee Valley Area of Outstanding Natural Beauty (AONB) where the primary objective is the conservation and enhancement of natural beauty.

NRW consider the proposal will not affect the purpose of the AONB (a small dwelling could be accommodated here without significant effect on the character of the AONB), however, there could be local issues to consider. We therefore advise that discussions are held with the Local Authority's landscape specialist.

We note that the drainage plan has been amended to show the canopy spread of existing trees and includes a native species hedgerow along the northern boundary of the plot to help integrate the building within landscape views.

We would advise within any subsequent reserved matters application that any external lighting is to be minimal to support the conservation of Dark Skies (external lighting details should to be submitted).

Protected Species

We have reviewed the following submission:

- Stirling, P. (2021). Preliminary Ecological Appraisal: Garreg Llwyd. Arbor Vitae Environment Ltd. Unpublished

The report concluded the following in respect of bats and Great Crested Newt:

The habitats on site do not provide any potential roosting sites for bat species. The adjacent hedgerows provide limited opportunities and there are no records of bats within 1km of the site...

...There are no records of GCN within 1km of the site and the grassland on site does not offer suitable terrestrial habitat to GCN.

We therefore have no comments in relation to this aspect of the application.

Other Matters

Our comments above only relate specifically to matters included on our checklist, Development Planning Advisory Service: Consultation Topics (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

Advice for the Developer

Pollution Prevention

During the construction phase you should take any precaution to prevent contamination of surface water drains and local watercourses. Oils and chemicals should be stored in bunded areas and spill kits should be readily available in case of accidental spillages.

For further guidance please refer to GPP 5 and PPG 6 at the following link:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Environmental Management

All works at the site must be carried out in accordance with PPG6: 'Working at construction and demolition sites' which are available on the following website:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

The activity of importing waste into the site for use as, for example hardcore, must be registered with Natural Resources Wales as an exempt/permittable activity under the Environmental Permitting Regulations 2016. The developer should contact Natural Resources Wales to discuss the necessity for an exemption/permit for any material imported to and exported from the site.

If during construction/excavation works any contaminated material is revealed, then the movement of such material either on or off site should be done in consultation with Natural Resources Wales. Any waste excavation material or building waste generated in the course of the development must be disposed of satisfactorily and in accordance with Section 34 of the Environmental Protection Act 1990. Carriers transporting waste from the site must be registered waste carriers and movement of any Hazardous Waste from the site must be accompanied by Hazardous waste consignment notes.

Waste produced during construction

Waste produced during the construction phase of your development must be dealt with appropriately and be in line with all relevant waste legislation including Duty of Care Regulations and Hazardous Waste Regulations. As part of your waste duty of care you must classify the waste produced:

- before it is collected, disposed of or recovered
- to identify the controls that apply to the movement of the waste
- to complete waste documents and records
- to identify suitably authorised waste management options
- to prevent harm to people and the environment.

Any waste removed from site will be subject to waste management controls. The links below provide information on how to classify waste and register as a waste carrier or hazardous waste producer:

<https://naturalresources.wales/permits-and-permissions/waste/?lang=en>

<https://naturalresources.wales/permits-and-permissions/waste/waste-permits/?lang=en>

Further guidance can be found on the GOV website here: <https://www.gov.uk/managing-your-waste-an-overview/duty-of-care>

If you have any queries on the above, please do not hesitate to contact us.

Yours faithfully,

Gareth Thomas
