1 INTRODUCTION

1.1 The Scheme

- 1.1.1 Etive Ecology Ltd was commissioned by Little Hobbit Forest School to undertake an ecological appraisal of a plot of land South of the Lodge, Glascoed Road, Bwlchgwyn Road, Wrexham. The application site is centred on National Grid References SJ 26797 53889.
- 1.1.2 The proposed scheme is in relation to a change of use for the site which previously was granted planning permission for use as a cattery (P/2010/0045). Initial works were commenced on the consented development but were not completed and are no longer intended to be implemented. The application for a change of use is to use the site as a Forest School for local children. Although there are no planned changes for the land within the red line boundary, a Preliminary Ecological Appraisal has been requested by Wrexham County Borough Council to inform the planning application (VAL/2022/0292).

1.2 Scope of this Report

- 1.2.1 The ecological appraisal of the proposed scheme is broadly based upon the *Guidelines for Preliminary Ecological Appraisal* (Chartered Institute of Ecology and Environmental Management, 2017).
- 1.2.2 The aim of the assessment is to obtain information on the existing ecological composition and value of the site, and to conduct a preliminary assessment of the likely significance of ecological impacts. To achieve this, the following steps were taken:
- The field survey area and the 'zone of influence' of the scheme, have been identified.
 - A desk study has been undertaken using freely available resources and biological records obtained from the Local Record Centre (COFNOD).
 - Baseline information on the site and surrounding area has been recorded through an 'extended Phase 1 survey', including a Phase 1 habitat survey (JNCC 2010) and consideration of notable and/or protected habitats and species (IEA 1995).
 - The ecological features found to be present have been evaluated (CIEEM, 2019) .
 - Invasive plant and animal species (such as those listed on Schedule 9 of the Wildlife & Countryside Act [WCA]) have been identified.
 - Potential constraints to the proposed change of use and any ecological impacts arising from the change of use have been identified.
 - Recommendations for further survey have been made, where appropriate.
 - Mitigation recommendations have been provided based on current information.
- 1.2.3 A Phase 1 Habitat Map of the survey area is presented in **Appendix A**. Target notes are marked on the Phase 1 Habitat Map and are used to link the report text to locations on site. Photographs taken during the survey are presented in **Appendix B**.

2 METHODOLOGY

2.1 Desk Study

2.1.1 A desk study was undertaken to identify any nature conservation sites within 1km of the site. The desk-based exercise also considered the potential for protected and/or notable species of fauna to be found within 1km of the site.

2.1.2 The following sources of information were utilized:

- MAGIC website (<http://www.magic.gov.uk/MagicMap.aspx>)
- Wrexham County Borough Council (<https://www.wrexham.gov.uk/>)
- Natural Resources Wales website (<https://naturalresources.wales/>)
- Wales Biodiversity Partnership (<https://www.biodiversitywales.org.uk/>)

2.2 Extended Phase 1 Habitat Survey

2.2.1 The initial site visit was made on the 5th January 2023.

2.2.2 The survey comprised an extended Phase 1 Habitat Survey. This survey method follows the habitat assessment and classification procedure outlined by the Handbook for Phase 1 Habitat Survey (JNCC, 2010), whereby all habitats are identified, described and mapped using a standard classification.

2.2.3 The extended component of the survey is developed from the methodology described in Guidelines for Baseline Ecological Assessment (IEA, 1995). All habitats and features within the survey area are assessed for their potential to support legally protected or notable species (nationally or locally).

2.2.4 These species include:

- **Amphibians:** ponds within 250m of the site were considered for their suitability to support a range of amphibians, including great crested newts (GCN).
- **Reptiles:** the site was assessed for suitable habitats including rough grassland, cloddiau, brownfield sites and habitat edges in general which would provide cover, basking and foraging habitat for reptile species.
- **Otters:** watercourses within 100m of the site were checked for signs of otter and assessed for their suitability to support the species.
- **Water voles:** watercourses on site were checked for signs of water vole presence and assessed for their potential to support the species.
- **Bats:** all trees and structures on site were assessed as to their suitability to support roosting bats at any point during the year. Trees and structures were then categorised for their potential to support roosting bats as per the *Bat Surveys for Professional Ecologists – Good Practice Guidelines* (Collins, J., 2016).
- **Birds:** the site was assessed for suitable habitats for nesting birds, including habitats suitable for ground-nesting species.
- **Badgers:** all habitats within 30m of the site were surveyed where possible to identify the presence of any setts or signs of badger activity.

- **Invasive plant species:** this assessment does not constitute a full Schedule 9 species survey. The potential for any Schedule 9 species was assessed and any species that were encountered were mapped and noted.

2.3 Assessment of Ecological Value

2.3.1 The value and sensitivity of ecological features was determined based on the guidance given in *Guidelines on Ecological Impact Assessment* (CIEEM, 2019). Individual ecological receptors (habitats and species that could be affected by the development) were assigned levels of importance for nature conservation in one of the following categories:

- International
- UK
- National
- County
- District;
- Local, or
- within the immediate zone of influence or site only.

2.3.2 For a given receptor, determination of value includes consideration of the size, secondary or supporting value/function, conservation status and quality of the species or feature.

2.4 Limitations

2.4.1 The initial Phase 1 Habitat survey was undertaken outside of the recommended survey season. However, given the current land use and management of the site, and the applicant's knowledge of the site, it was possible to confidently classify all habitats and to identify the majority of species present.

2.4.2 Access was permitted to all land within the site boundary. Access beyond the site boundary was restricted but much of the adjacent land was at least visible to the surveyor, with the applicant providing further knowledge and information about the species and habitats on the adjacent fields.

2.4.3 There are considered to be no other significant limitations to the undertaking of the survey work or subsequent ecological appraisals.

3 RESULTS

3.1 Desk Study

Designated Sites

3.1.1 There are no statutory located within 1km of the site.

3.1.2 There are four non-statutory sites for nature conservation sites within 1km of the site:

- Nant-y-Ffrith (LWS): Located approximately 20m north of the site. Stream surrounded by a wooded valley consisting of deciduous and coniferous woodland.
- Glascoed Wood (LWS): Located approximately 570m east of the site. An ancient woodland which forms part of the Glascoed Commons.
- Bwlchgwyn Quarry (LWS): Located approximately 800m southwest of the site.
- Gwernto Wood (LWS): Located approximately 920m northwest of the site.

Species Records

3.1.3 A full list of the species records within 1km of the site is provided in **Appendix C**. Below is a summary of these species records:

- Amphibians: common frog, common toad and great crested newt (GCN).
- Bats: Brandt's bat, brown long-eared bat, Daubenton's bat, lesser horseshoe bat, Natterer's bat, and whiskered bat.
- Birds: numerous species including barn owl, bullfinch, curlew, dunnock, goldfinch, kestrel, mistle thrush, reed bunting, starling, tawny owl, and wren.
- Invertebrates: various species including brown hawket, common blue damselfly, and common darter.
- Mammals: otter, badger, hare and hedgehog.
- Reptiles: adder, common lizard, grass snake and slow worm.
- INNS: giant hogweed and Japanese knotweed.

Environment (Wales) Act 2016

3.1.4 Section 7 of the Act replaced the 'Biodiversity duty' in Section 40 of the Natural Environment and Rural Communities (NERC) Act 2006, which requires all public bodies to have regard to biodiversity conservation when carrying out their functions. This is commonly referred to as the 'Biodiversity duty'.

3.1.5 The Section 7 list is now used to identify those habitats and species of Principal Importance in Wales under the Environment (Wales) Act. The following relevant habitats and species are found on this list:

Table 3.1.1 Relevant Section 7 Habitats/Species

Habitats	Species
Broadleaved woodland	Reptiles
Improved grassland	GCN
	Common toad
	Brown hare
	Hedgehog
	Various bat species
	Various bird species

3.2 Extended Phase 1 Habitat Survey

- 3.2.1 The walkover survey was undertaken by Russell Grey (BSc, MCIEEM, CEnv) and assisted by Sophie Frost (BSc, GCIEEM). The survey was undertaken on an overcast but dry day, with temperatures around 10°C and no constraints to the survey of any part of the red line application site.
- 3.2.2 Little Hobbit Forest School is located to the south off Glascoed Road. The site is surrounded by broadleaved woodland to the north (Nant-y-Ffrith LWS) and west, and grazed farmland to the east and south. A residential estate is situated approximately 480m southeast of the application site. There are no ponds located on site or <250m. The nearest water-courses are minor drains located 200m south of the application site and 250m to the north in Nant-y-Ffrith LWS.

Habitats

- 3.2.3 The eastern section of the site comprises of ~0.2ha of poor semi-improved grassland (Target Note 5), which has previously been grazed by sheep. Two further areas of poor semi-improved grassland are located at the north and south ends of the site, surrounded by stock fencing and housing goats, domestic ducks and chickens (Target Note 1). A brick wall forms the border along the western edge side of the large patch of semi-improved grassland. An outbuilding is located within the southern area of grassland to the south, housing a small flock of goats. Following a line of scattered broadleaved trees and scattered scrub, three further outbuildings and a temporary tepee (Target Note 6) are located within the centre of the semi-improved grassland, used as part of the forest school. To the north of these structures lies a chicken coop (Target Note 5) and a soil mound (Target Note 4). The scattered trees and scrub consist of Scots pine (*Pinus sylvestris*), larch (*Larix*), oak (*Quercus*), laurel (*Laurus nobilis*), rhododendron (*Rhododendron*), and holly (*Ilex*). Scattered scrub and scattered trees are also found along the northern and eastern red line boundaries. A pond is situated within the southern corner of the site (Pond 1).
- 3.2.4 Mixed semi-natural woodland, comprising of yew (*Taxus baccata*), redwood (*Sequoia sempervirens*), silver birch (*Betula pendula*), ash (*Fraxinus*) and elder (*Sambucus*), with an understory of laurel, gorse (*Ulex*), bramble (*Rubus*), hawthorn (*Crataegus*) sweet chestnut (*Castanea sativa*), soft rush (*Juncus effusus*), foxglove (*Digitalis*) common nettle (*Urtica dioica*) and bare ground, is found in the southwest corner of the site and in land adjacent to the west of the application site. Within the woodland are two plots where under-storey clearance has been undertaken (Target Notes 2 and 3) to facilitate learning areas as part of the forest school. Scattered broadleaved trees, including a recently wind-blown mature specimen, surround these outdoor classroom areas.
- 3.2.5 The site is accessed via an entrance off Glascoed Road at the northern corner of the site. Here there is a small car park on bare ground, surrounded by mixed semi-natural woodland and scattered broadleaved trees. A small duck-pond surrounded by tightly grazed improved grassland and a stock-fence sits adjacent to the car park and was observed to be used by 3-4 ducks at the time of survey (Pond 2).
- 3.2.6 To the west of the application site, but within the ownership boundary, lies a residential property surrounded by an amenity grassland garden with ornamental introduced shrubs and a driveway of hardstanding. Mixed semi-natural woodland in this area includes a small pond

which is surrounded by scattered broadleaved trees (including cherry (*Prunus*) and monkey puzzle (*Araucaria araucana*)) and a stock-proof fence (Pond 3). A bug hotel, bird boxes and native wildflower and herbaceous planting have been introduced into this area to encourage wildlife.

Protected Species

- 3.2.7 The following text summarises the suitability of the survey area to support various legally protected species, based on the descriptions provided in the above target notes.

Amphibians

- 3.2.8 There are two ponds located within the application site boundary and a third pond located within the ownership boundary. There are no other ponds within 250m of the application site; the closest located ~520m northwest of the site. Pond 1 at the southern corner of the site supports relatively shallow water and is surrounded by young broadleaved trees. Little aquatic vegetation was observed at the time of survey but the water quality appeared to be very good. The pond has low potential to support GCN. Pond 2 is the duck pond at the northern end of the site. This is a very small water-body with poor water quality, no aquatic vegetation and actively used by 3-4 ducks at the time of survey. The pond is considered to be wholly unsuitable to support GCN. Pond 3 is located within the garden of the adjacent residential property and has been fenced off to protect it from disturbance. Although quite small, the water quality was good and there were a number of marginal plants present, but there remains a high level of shading from adjacent trees and woodland. The pond has low potential to support GCN.
- 3.2.9 The terrestrial habitat present within the application site is generally of high value to amphibians including GCN. The woodland, scrub and rough grassland provide opportunities for shelter and foraging. All of these habitats suffer from a degree of disturbance associated with the forest school, but the habitats were in moderate condition at the time of survey and are well connected to off-site habitats of similar value.
- 3.2.10 There are no records of amphibians within the application site boundary. There are records of common frog (*Rana temporaria*) and GCN ~380m to the west of the site. Given the high value of existing terrestrial habitats on site and the presence of two ponds of low potential breeding value, amphibians are considered likely to be present on site.

Badgers

- 3.2.11
- 3.2.12 No badger setts or any signs of badger activity were found during the walkover survey of the site, or any land within 30m of the site boundary.
- 3.2.13

Bats

- 3.2.14 The terrestrial habitat within the application site includes a mixed semi-natural woodland, and scattered trees across the site. Although the majority of the trees within the application site are in good condition, there are a number which support features of potential value for roosting bats (BPR¹). A number of bat boxes have also been installed on trees within and adjacent to the site boundary. The habitat is ideal for foraging bats and provides good connectivity with adjacent habitats of similarly high value to bats. None of the buildings within the application site offer any potential roosting features (PRFs) and are heavily disturbed by forest school activities. The residential buildings adjacent to the west of the site were assessed to be of Medium BRP owing to ivy coverage and small access gaps in timber fascia/soffits and beneath roof tiles.
- 3.2.15 There were no signs of bats within the application site boundary during the walkover survey. However, the survey was carried out during the hibernation period so it was unlikely that they would be currently present on site.
- 3.2.16 There are no records of bats specific to the application site boundary. However, there are several records of bats within 1km, including brown long-eared bat (*Plecotus auritus*), lesser horseshoe bat (*Rhinolophus hipposideros*), and Myotis species (*Myotis sp.*) from 290m to the north of the site. The applicant also indicated that bats had been seen flying within the application site boundary and that bats appeared to be roosting within one of the residential buildings to the west of the application site. It is therefore concluded that bats are present locally and are confirmed to use the site for foraging/commuting.

Nesting Birds

- 3.2.17 The composition of mixed semi-mature woodland, ponds, scrub and semi-improved grassland is of potential high value to a variety of nesting bird species. These habitats also offer good foraging opportunities. A number of nest boxes have also been placed on trees around the site and in immediately adjacent land to encourage nesting birds onto site. Furthermore, the adjacent mixed woodland of Nant y Ffrith provides an extensive area of high value habitat for nesting, foraging and sheltering birds.
- 3.2.18 There are no bird records within the application site boundary. However, there are records for a number of bird species within 1km of the site including common cuckoo (*Cuculus canorus*), kestrel (*Falco tinnunculus*), lesser redpoll (*Carduelis cabaret*), skylark (*Alauda arvensis*), tree pipit (*Anthus trivialis*) and wood warbler (*Phylloscopus sibilatrix*). Barn owl (*Tyto alba*) have also been spotted hunting on site by the applicant. Due to the high suitability of

¹ **High** = trees or buildings with one or more potential roost sites suitable for use by larger numbers of bats on a more regular basis and potentially for longer periods of time. **Medium** = trees or buildings with one or more potential roost sites that could be used by bats but unlikely to support a roost of high conservation status. **Low** = trees or buildings with one or more potential roost sites that could be used by individual bats opportunistically, but are not suitable to be used on a regular basis by larger numbers of bats. **Negligible** = negligible features likely to be used by roosting.

the habitat within the application site boundary and the surrounding area, it is highly likely that birds are using the site for nesting.

Reptiles

- 3.2.19 The terrestrial habitat within the application site includes an area of semi-improved grassland which has previously been grazed and is currently used as part of the forest school activities. The grassland is of low value to reptiles in its current state but is edged with scattered scrub and a stone wall to the west. A number of brash piles have been created across the site using offcuts from felled trees and other detritus, providing sheltering opportunities for reptiles. The mixed woodland habitat is of low value due to its closed-canopy structure and poor basking suitability. Ponds 1 and 3 may also be of value to reptiles such as grass snake. The regular management and daily activities across the site are likely to pose a level of disturbance that would be sub-optimal for reptiles.
- 3.2.20 There were direct observations of reptiles during the site survey, owing to the timing of the survey within the winter period.
- 3.2.21 There are no records of reptiles within the application site boundary but there are records of adder (*Vipera berus*), common lizard (*Zootoca vivipara*), grass snake (*Natrix natrix*), and slow worm (*Anguis fragilis*) within 1km of the site. The closest of these records are ~150m from the application site boundary. Due to the low value habitat and the high level of disturbance on site, it is considered that reptiles are currently likely absent from the red line boundary.

Riparian Mammals

- 3.2.22 The aquatic habitat within the application site boundary is of negligible value to riparian mammals such as otters (*Lutrinae*) and water vole (*Arvicola amphibius*) due to the absence of fish and other food sources within Ponds 1 and 2. Pond 3 is also unsuitable to support either species, as it is a garden pond and subject to disturbance. There are no water-courses on site and the nearest streams are located 200m to the south and 250m north. These could not be accessed to assess their potential to support riparian mammals.
- 3.2.23 There are no records of riparian mammals within the application site boundary. Otter have been recorded 680m to the north. Due to the low value habitats within the application site, the disturbance posed by site activities and lack of suitable connecting habitat off-site, it is considered that riparian mammals are absent from the site boundary.

3.3 Notable Species

- 3.3.1 There are two records of hedgehogs (*Erinaceinae*) within 1km of the site; 540m to the south. There is one record of brown hare within 1km of the site; 670m to the north from 2004. The site has the potential to support hedgehogs due to the presence of suitable habitat in the form of scattered scrub, woodland and the semi-improved grassland. This habitat assemblage is of lesser value to brown hare but still offers some value to the species, who favour woodland edges adjacent to grassy fields to allow for foraging and shelter opportunities. However, the level of daytime disturbance on site is unlikely to be tolerated by brown hare. Hedgehog are considered to be likely present and brown hare are considered likely absent from the site.

- 3.3.2 No notable or locally rare species of flora were recorded on site within the site walkover. However, notable species such as bluebell (*Hyacinthoides non-scripta*) have been recorded within 1km of the site boundary.

3.4 INNS

- 3.4.1 There were no invasive non-native species (INNS) recorded during the site walkover.
- 3.4.2 COFNOD returned records for giant hogweed (*Heracleum mantegazzianum*) and Japanese knotweed (*Reynoutria japonica*) within 1km of the application site boundary. Notably, Japanese knotweed has been recorded 150m to the south.

3.5 Key Ecological Receptors

- 3.5.1 The extended Phase 1 Habitat Survey has identified the following key ecological receptors associated with the site:
- Habitats; the site supports mixed semi-natural woodland and pond habitats; *Local Value*.
 - Amphibians; site offers suitable habitat for numerous amphibian species, including both terrestrial and aquatic habitats; *Local Value*.
 - Bats; a bat roost is located adjacent to the site and the site itself supports good foraging/commuting habitats; *Local Value*
 - Nesting birds; the habitats on site are considered to be of high value for nesting birds; *Local Value*.
 - Notable Species; site offers suitable habitat for a range of invertebrates and for hedgehogs; *Local Value*.
 - INNS; Japanese knotweed has been recorded locally. Potentially significant at the *Local Scale*.
- 3.5.2 The protected species / ecological receptors not bullet-pointed above are considered to be of *less than local value*.

4 DISCUSSION

4.1 Proposed Scheme

4.1.1 The footprint of the proposed change of use application site is illustrated on **Figure 2**. The proposed application is detailed within the planning application, and is summarised in the following bullet points:

- Proposed change of use from the consented development and use as a cattery to a 'forest school' for young children.
- There are no proposed changes to any of the existing buildings on site, although the previous field shelter (in a poor state of repair) has been replaced with a new shelter to support forest school activities.
- There are no proposed changes to the habitat layout of the site. The current extent of woodland habitat will be retained.
- To complement the running of the 'forest school', the site is to be managed in a sustainable way which encourages biodiversity.

4.2 Likely Impacts

4.2.1 The Forest School is currently operational, taking small groups of children throughout the day and engaging in environment-based learning and activities. Compared to the previous management of the site (sheep-grazing) and the consented development of the site as a cattery, the forest school is a positive use of the site.

4.2.2 The school intends to retain the existing woodland and to enhance it through the selective removal of non-native species such as cherry laurel, the creation of brash piles and the installation of bat and bird boxes. The existing ponds on and adjacent to the site have already been enhanced since the school came into operation, with some vegetation clearance to reduce the shading levels. The semi-improved grassland is subject to relatively low levels of physical disturbance as much of the school activities are centred around the existing field shelter. The remaining grassland areas have been allowed to establish a rough tussocky structure.

4.2.3 The use of the site as a forest school poses no direct or indirect impacts on bats. There is no intention to remove any trees from the site, there are no activities during the hours of darkness and no additional lighting has been installed or is required for the operation of the school. Instead, there have been beneficial impacts in the installation of bat boxes and habitat enhancements to the woodland and the grassland management regime.

4.2.4 There may be a minor disturbance impact on nesting birds during the breeding season and to hedgehogs as a result of the forest school, but this is unlikely to be significant as the majority of school activities are within areas of already disturbed ground – of low value to these species. The main disturbance is likely to be from noise and is therefore anticipated to be minor.

4.2.5 The risk of introducing INNS to the site is considered to be no greater than the risk associated with the ongoing pastoral management of the site or the use of the site as a cattery, i.e. a low risk.

4.3 Recommendations

4.3.1 There are no specific recommendations made to mitigate any impacts arising from the proposed change of use, as no significant impacts have been identified above. However, the following recommendations are made to guide the ongoing operation and management of the site in a way that might enhance biodiversity and the schools engagement with nature:

- Woodland management; target the removal of non-native species where necessary for school activities. Replace any windfall with native species, either by natural succession or planting. Logs and brash should be retained on site to form habitat piles and hibernacula.
- Grassland management; mow pathways through the grassland as required, allowing the majority of the area to grow wild. Manage the 'wild' areas annually either by a late season cut or sheep-grazing (August/September). Any grassland cutting could be raked up and collected to form large grass heaps – offering excellent grass snake egg-laying habitat if left undisturbed.
- Pond management; Ponds 1 and 3 should be managed to maintain not more than 50% shading from adjacent trees. Fish should be removed where possible. One hibernacula should be placed near the edge of each pond, to offer shelter to amphibians.
- Bats; any future bat boxes should be placed along existing tree lines (excellent flight paths). Bat boxes should be placed >4m height and facing in a southeast or southwest direction away from artificial lighting. Boxes should be grouped together in varied positions to provide different options for roosting bats throughout the year. Ensure that there are clear flightpaths to each bat box.
- Birds; any future bird boxes should be placed within suitable habitat (trees/scrub/woodland), facing northeast or northwest to avoid full sun or strong winds.
- Reptiles; the woodland, grassland and pond management measures given above will improve the suitability of on-site habitats for reptiles. Additionally, suitable reptile habitat should be left undisturbed wherever possible, particularly over the winter period (October to March inclusive).
- Notable species; the management measures given above will improve the suitability of on-site habitat for hedgehogs and invertebrates. Additionally, hedgehog houses or shelters could be constructed using a variety of different materials and left in undisturbed areas on site such as dense scrub or woodland under-storey.
- INNS; if any non-native invasive species of flora is found on site, further advise should be sought from a suitably experienced ecologist so that it can be eradicated as soon as possible.

5 CONCLUSION

- 5.1 Etive Ecology Ltd was commissioned by Little Hobbits Forest School, to undertake an ecological appraisal of land adjacent to The Lodge, Glascoed Road, Bwlchgwyn Road, Wrexham. The site is subject to a 'change of use' application from a cattery to a forest school (VAL/2022/0292).
- 5.2 The assessment comprised of an Extended Phase 1 Habitat survey, a desk study, an assessment of the likely impacts on the ecological value of the site and recommendations for further survey and/or mitigation measures to be implemented.
- 5.3 A desktop data search identified no statutory nature conservation sites and four non-statutory nature conservation sites (all Local Wildlife Sites) located within <1km of the site; Nant-y-Ffrith, Glascoed Wood, Bwlchgwyn Quarry, and Gwernto Wood. Protected species records for the area include adder, common lizard, common toad, brown hare, grass snake, GCN, otter, slow worm, and various bird, bat and invertebrate species.
- 5.4 Little Hobbit Forest School is already in operation, located off Glascoed Road. The site is surrounded by mixed semi-natural woodland to the north and west, most notably Nant-y-Ffrith to the north. Pastoral farmland dominates to the east and south. A residential housing estate is situated approximately 480m southeast of the application site. There are three ponds on or adjacent to the site, but no other ponds within 250m of the application site.
- 5.5 The site is comprised of collectively ~0.3ha of semi-improved grassland and ~0.1ha of mixed semi-mature woodland and smaller areas of bare ground and scattered scrub. Two ponds are located within the site boundary and one in immediately adjacent to the northwest within the garden of The Lodge residential property. The site is considered likely to support amphibians, nesting birds, foraging/commuting bats and notable species such as hedgehog.
- 5.6 The use of the site as a forest school does not require any changes to the layout of the site as seen during the ecological walkover survey. There will be no loss of any notable habitats but there is likely to be some disturbance from daily forest school activities. Positive impacts and changes to the site have included the removal of non-native woodland vegetation, the installation of bat / bird boxes and the reduction in grazing impacts. Adverse impacts are primarily associated with daytime disturbance (noise, vibration, human activity) on protected species such as reptiles, hedgehog and nesting birds.
- 5.7 No specific measures are required to mitigate the likely adverse impacts, as all are considered to be minor. However, as number of recommendations have been made in order to encourage the enhancement of the site for biodiversity and the engagement of the children with wildlife. These measures include careful habitat management across the site, the creation of habitat piles and hibernacula, additional bat/bird boxes and minimising disturbance during the hibernation period.
- 5.8 In conclusion, the application site has been found to be of ecological value at the local scale, with the potential to support legally protected and/or notable species. The impacts of the proposed change of use are minimal and recommendations have been given to further enhance the ecological value of the site. As a result, the proposed scheme is anticipated to result in a net benefit for biodiversity at the local scale.

Cofnod Environmental Information Search (PUBLIC VERSION)

Our Reference	CO/E10735
Your Reference	Forest School
Requested By	Russell Grey, Etive Ecology
Data Users	Russell Grey
Search Date	04/01/2023 11:55
Expiry Date	04/07/2023 (may be extended on request)
Search Type	Chargeable

Important Information

- Use of the data is governed by Cofnod's [Terms & Conditions](#).
- Data marked as confidential or sensitive must not be released into the public domain, with the exception of the Public Version of the PDF report, which has had sensitive information removed or restricted.
- You should not amend any part of the downloaded records.
- Unless otherwise agreed, use of the data is valid until the Expiry Date (04/07/2023).
- Past records of presence of a habitat or species do not guarantee continued occurrence; absence of records does not imply absence of a species, merely that no records are held by Cofnod; Cofnod cannot guarantee the accuracy of supplied data; copyright of records remains with the original recorder.
- The Dataset ID associated with each record can be used to find information about the provenance of the data. See the [Cofnod Metadata](#) page for more information.
- Verification Levels are given for each record and indicate whether the record has been assessed by an expert.
- Please [contact us](#) if you have any questions about using the data or wish to add further Data Users.

Notes

- Records with 1km, 2km, 5km, 10km or 100km grid references (where present) are highlighted with, for example, (1km) next to the distance to indicate that the distance

should not be considered to be exact given the vague nature of the grid reference.

- Records shown in **bold** typeface are sensitive species records, and some details have been restricted in this public version of the report.

Verification Levels

- **UA**: Unassessed
- **PC**: Probably Correct
- **KC**: Known Correct
- **NA**: Not Required

Species Categories

- **All Other Species**: Any species not included in other categories
- **Category 1 Species**: Species with European and/or UK Legal Protection, Section 7 Species or UK BAP Priority Species
- **Category 2 Species**: Global Red List, British Red Data Book, Nationally Rare & Scarce, Welsh Red and Amber Birds & Welsh Vascular Plant Red Data List, not identified in Category 1
- **Category 3 Species**: Local species not identified under Categories 1 & 2, Locally Important species as specified by local experts

Data Description

Distance	Indicates the distance, in metres, between the grid reference of the record (using the central point of the grid square) and the search location. For any Sensitive Species Records, this should not be released into the Public Domain.
Species Name	Name of the taxon (usually identified to species level) using the binomial system.
Grid Reference	Grid reference based on the Ordnance Survey grid system.
Date	Date on which the record was made. In some cases this might be a date range, or a vague date such as 'Summer 2010'.
Recorder(s)	One or more people who made the original observation and recorded it in some way. It may have subsequently been included in a data collation by another person or it may have been submitted to the LERC directly.
Abundance	Number of individuals recorded. Where not specified it is assumed that at least one was present.
Record Type	A description of the type of record.
Site Name	The site name (if one has been supplied). For any Sensitive Species Records, this cannot be released into the Public Domain.
Notes	Any additional notes about the sighting. For any Sensitive Species Records, this cannot be released into the Public Domain.
Dataset ID	ID of this dataset. See 'Important Issues' for more details.
Lists	Any local, national or international conservation statuses or legal protection which apply to this species and whether it is included in any Local Biodiversity Action Plans. See 'Abbreviations' for more details.
V	An indicator showing the level of confidence held in the record's correct identification.

Dataset Information

The records in these results are drawn from the following datasets. Use the Dataset ID next to each record to find its dataset.

Dataset ID	Title	Acknowledgements	Type
D0026/055/01	Records captured from CCW regional files - CCW File SJ24.1 - SSSI: Ruabon/Llantysilio Mountains And Minera - General	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0035/002/01	Vice-County dataset - Reptile records from Denbighshire and Flintshire Vice-counties (50 and 51)	Mick Brummage (North East Wales Amphibian and Reptile Network)	Species
D0059/001/03	North Wales badger records held by Clwyd Badger Group (including some historic data) - CBG Historic sett data	Clwyd Badger Group (clwydbadgergroup@btinternet.com)	Species
D0059/009/01	North Wales badger records held by Clwyd Badger Group (including some historic data) - Badger road traffic accidents recorded by CBG, imported from spreadsheet	Clwyd Badger Group (clwydbadgergroup@btinternet.com)	Species
D0062/008/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - All records up to 2018	Ian M Spence (Clwyd Bird Recording Group)	Species
D0062/010/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - 2019 records	Ian M Spence (Clwyd Bird Recording Group)	Species
D0098/001/02	Bat records held by Clwyd Bat Group - Hibernation records to Winter 2016	Clwyd Bat Group	Species
D0098/002/01	Bat records held by Clwyd Bat Group - Hibernation records Winter 2016-17	Clwyd Bat Group	Species
D0098/003/01	Bat records held by Clwyd Bat Group - Hibernation records Winter 2017-2018	Clwyd Bat Group	Species
D0098/004/01	Bat records held by Clwyd Bat Group - Hibernation records Winter 2018-2019	Clwyd Bat Group	Species
D0098/005/01	Bat records held by Clwyd Bat Group - Hibernation records Winter 2019-2020	Clwyd Bat Group	Species
D0098/008/01	Bat records held by Clwyd Bat Group - Hibernation records Winter 2021-2022	Clwyd Bat Group	Species
D0101/001/01	Historic Vice-County dataset - Vascular plant records from Flintshire Vice-county (50) digitised by Cofnod - Species summary cards	Goronwy Wynne (BSBI Vice County Recorder)	Species
D0108/001/03	Brown Hare records collated by North Wales Wildlife Trust - Brown Hare records	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D0127/001/02	Historic Vice-County dataset - Butterfly records from Denbighshire and Flintshire Vice-counties (50 and 51)	Rob Whitehead	Species
D0132/001/02	Green Shoots North Wales records	British Association for Shooting and Conservation	Species

D0137/001/01	Great Crested Newt (Triturus cristatus) Sites in Wales	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0217/001/04	Welsh Invertebrate Database (WID) - Records from within the Cofnod boundary	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D0227/002/01	Flintshire Wildlife Sites - Species records extracted from Wildlife Site Database	Cyngor Sir y Fflint/Flintshire County Council	Species
D0229/002/01	Wrexham Wildlife Sites data - Database	North Wales Wildlife Trust & Cyngor Bwrdeistref Sirol Wrecsam/Wrexham County Borough Council	Species
D0248/002/01	Miscellaneous species records collected by Pearce Environment Ltd on behalf of various clients - Records from 2017 and 2018	Pearce Enironmental Ltd	Species
D0969/001/05	Miscellaneous species records submitted to rECOrd	rECOrd	Species
D1072/001/02	Mammal records from Britain from the Atlas of Mammals (1993), with some subsequent records	Biological Records Centre (NBN Download)	Species
D1075/001/06	Bryophyte data for Great Britain from the British Bryological Society held by BRC: Atlas 2014 - North Wales data	British Bryological Society (NBN download 04/12/2019)	Species
D1076/001/02	Reptiles and Amphibians Dataset	Biological Records Centre (NBN Download)	Species
D1081/001/03	Caddisfly (Trichoptera) records from Britain' held by UK Trichoptera (Caddisfly) Recording Scheme	Biological Records Centre & UK Caddis Recording Scheme	Species
D1117/001/01	ad hoc Cofnod Online Recording System records	Individual Recorder(s)	Species
D1122/001/01	ANON - HERPETOFAUNA CONSULTANTS INTERNATIONAL, 1992: "Crested Newt Survey of North-East Clwyd. A report to the Countryside Council for Wales (September 1992)". - Great Crested Newt data	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1122/002/01	ANON - HERPETOFAUNA CONSULTANTS INTERNATIONAL, 1992: "Crested Newt Survey of North-East Clwyd. A report to the Countryside Council for Wales (September 1992)". - Non Great Crested Newt data	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1169/004/02	Vice-County dataset - Vascular plant records from Denbighshire Vice-county (50). - Complete dataset	Delyth Williams (BSBI Vice County Recorder)	Species
D1201/001/01	British Arachnological Society/Spider Recording Scheme dataset	British Arachnological Society/Spider Recording Scheme	Species
D1230/001/01	Bullhead Monitoring for the Dee Catchment, 2004	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1234/002/01	Miscellaneous species records collected by Churton Ecology on behalf of various clients - 2008 records	Anne Kathryn Thorne and Robert Graham Thorne	Species
D1239/012/01	Miscellaneous species records captured from paper forms containing results of surveys on potential N E Wales Wildlife Sites. - SJ25 Wrexham Maelor	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species

D1239/026/01	Miscellaneous species records captured from paper forms containing results of surveys on potential N E Wales Wildlife Sites. - SJ25 Alyn + Deeside SJ 200 - 275	Ymddiriedolaeth Natur Gogledd Cymru/North Wales Wildlife Trust	Species
D1285/001/03	Vice-County dataset - Moth records from Denbighshire and Flintshire Vice-counties (50 and 51)	Justin Williams	Species
D1295/001/05	Dragonfly records from the British Dragonfly Society Recording Scheme - Records from the Cofnod area	British Dragonfly Society Recording Scheme (2022). Dragonfly records from the British Dragonfly Society Recording Scheme. Occurrence dataset on the NBN Atlas	Species
D1297/025/01	BirdTrack records - 2004-2018 data from Vice-Counties 50 & 51 (Denbighshire & Flintshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/026/01	BirdTrack records - 2019 data from Vice-County 50 (Denbighshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/027/01	BirdTrack records - 2019 data from Vice-County 51 (Flintshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/039/01	BirdTrack records - 2020 records for Vice-County 50 (Denbighshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/040/01	BirdTrack records - 2020 records for Vice-County 51 (Flintshire)	Ian M. Spence and British Trust for Ornithology	Species
D1297/041/01	BirdTrack records - 1900-2003 records for Vice-County 51 Flintshire	Ian M. Spence and British Trust for Ornithology	Species
D1297/042/01	BirdTrack records - 1900-2003 records for Vice-County 50 Denbighshire	Ian M. Spence and British Trust for Ornithology	Species
D1297/047/01	BirdTrack records - 2021 records from within the Cofnod boundary (excluding Meirionnydd)	Julian Hughes & British Trust for Ornithology	Species
D1308/001/01	Flintshire (VC51) County Rare Plant Register - WYNNE, G. et al, 2008: "The Rare Plants of Flintshire". Unpublished report, compiled by Goronwy Wynne, Joe Phillips and Delyth Williams. BSBI.	Goronwy Wynne (former BSBI Vice County Recorder)	Species
D1308/002/01	Flintshire (VC51) County Rare Plant Register - BROWN, B.M., 2020: "The Rare Plants of Flintshire. A Register of the rare, scarce or threatened plants in the old county of Flintshire, botanical vice-county 51. Based on the original edition by Goronwy Wynne, with Delyth Williams & Joe Phillips". Botanical Society of the British Isles	Botanical Society of the British Isles	Species
D1330/001/01	Invasive Non Native Species records, submitted to Cofnod as part of the N. Wales and Dee Invasive Non Native Species Forum 'Record An Alien' project	Individual recorders	Species
D1383/001/01	Hedgehog records submitted to Cofnod via their Online Recording System	Individual Recorders, and North Wales Local Biodiversity Action Plan partnerships.	Species
D1486/001/01	Natural Resources Wales North Wales Bat Roosts	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1587/016/01	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - Records from May 2017	Jonathan Shanklin	Species
D1587/026/01	Plant records collected and collated by Jonathan Shanklin from VC51 (Flintshire) - November 2018	Jonathan Shanklin	Species

D1666/001/01	Records captured from Licence Returns submitted to Natural Resources Wales - Mammal records captured during 2016 from survey licence return forms	Cyfoeth Naturiol Cymru/Natural Resources Wales	Species
D1681/001/03	National Bat Monitoring Programme Hibernation Survey - Records received 12/03/2020	Bat Conservation Trust	Species
D1681/002/01	National Bat Monitoring Programme Hibernation Survey - Records received 22/09/2022	Bat Conservation Trust	Species
D1688/004/01	Big Hedgehog Map records - Records from 2010 to January 2020	People's Trust for Endangered Species	Species
D1702/001/01	Rare and Protected Species records across Wales 1975 to 2012 - Records from the Cofnod area	Cyfoeth Naturiol Cymru/Natural Resources Wales (NBN Download)	Species
D1734/001/02	Swift Inventory of Low-Level Screaming Parties in the UK, 2009-2014 - Records from Cofnod area	RSPB (NBN download, 23/01/2020)	Species
D1748/001/01	Miscellaneous species records collected by Tom Knight (personal records)	Tom Knight	Species
D1814/001/01	Records of Curlew and Lapwing collected as part of the Curlew Cymru Project	Individual recorders	Species
D1852/001/01	RSPB Big Garden Birdwatch winter sightings in the UK in 2008 - 2008 records	RSPB (NBN Download, 16/01/2019)	Species
D1852/002/01	RSPB Big Garden Birdwatch winter sightings in the UK in 2008 - 2009 records	RSPB (NBN Download, 16/01/2019).	Species
D1944/001/01	Big Bluebell Watch - 2017 records	The Woodland Trust (NBN Download)	Species
D1991/001/02	Moth records collected by Andrew Graham from VC's 50 and 51	Andrew Graham	Species
D2012/002/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - Ringing data - 2019 and earlier records not previously supplied	Ian M. Spence (Clwyd Bird Recording Group)	Species
D2012/003/01	Vice-County dataset - Bird records from Flintshire and Denbighshire Vice-counties (50 and 51) - Ringing data - Additional records supplied in 2017	Ian M. Spence	Species
