BOTH OF THESE E MAILS WE SENT TO MYSELF AND TO PLANITRON

Thank you for sending this through. I think the level of development on site is good in principle for option 1. I am keen to see as much of the historic frontage retained as possible. In this option is the plan to reuse the 20th Century portion of the building (to the right when viewing the listed building from the front) as a semi-detached dwelling with the old portion of the building? If this is the case and we are only losing the 80s extensions to the rear from the listed buildings then, subject to details, I am likely to be able to support such a scheme.

There are likely to be delays regarding phosphates on the application, and I would recommend looking for a specialist to provide information to support this aspect of an application.

I am going on extended leave from late September. Given the discussions that we have had it would be beneficial for the application to come in before then so I can provide a comment.

Yes I think the principle of these designs, with the porch retained, is acceptable. Agree with the approach of steel frame to the earlier section to allow maximum retention of elements which used to be structural but would not take load now, and rebuild of 19th C element as best as possible with what is standing.

Make sure the application includes the survey work that has been done to illustrate what is left in situ as that will give a clear indication to Cadw that you know what is left in the building and your plans reflect this.
