MEMORANDUM

From:	Angela Roberts Contaminated Land Officer	**To:**	Jenni Perkins Senior Planning Officer
Our Ref:	P/2025/0538	**Your Ref:**	P/2025/0538
Date:	17 July 2025	**No. of Pages:**	2

TOWN AND COUNTRY PLANNING ACT 1990

P/2025/0538 TREVOR BASIN OFF, STATION ROAD, TREVOR, LLANGOLLEN, WREXHAM, LL20 7TT

ERECTION OF REPLACEMENT BUILDING

Further to the consultation ENQ/2023/0102 we advised that should the former use of The Green Shed have the potential to cause residual contamination then we would recommend contamination conditions on any future permission granted to ensure the safe development of the site.

It is noted that the former use of the site is discussed in the Heritage Impact Statement and Historic Building Record submitted with the application, they indicate the former use to be associated with a workshop/garage and it contains an inspection pit which supports this further.

These former uses are potentially contaminative and the site will require a phased contamination assessment and if deemed necessary remediation and validation. Accordingly it will be necessary to condition any future consent so as to ensure that any potential contamination issues are adequately dealt with. I would recommend that the following conditions and informative note be applied to any future consent that may be granted.

Conditions

ZP01B CONTAMINATED LAND – PHASED INVESTIGATION
No development shall take place until a phased site investigation of the nature and extent of contamination has been carried out and submitted to and approved in writing by the Local Planning Authority. If any contamination is found during the site investigation, no part of the development shall commence until a scheme specifying the measures that will be taken to remediate the site to render it suitable for the development hereby permitted has been

submitted to and approved in writing by the local planning authority. The site shall thereafter be remediated in accordance with the approved scheme. If during the course of development any contamination is found that has not been identified in the site investigation, no further development shall take place on those parts of the site where that contamination has been found until an additional scheme of remediation has been submitted to and approved in writing by the local planning authority for those parts of the site. The relevant parts of the site shall thereafter be remediated in accordance with the additional scheme of remediation.

ZP02A VERIFICATION REPORT - CONTAMINATED LAND
Each part of the site subject to the remediation under the scheme(s) approved as part of condition @@ shall not be occupied/used until a Validation Report has been completed in respect of that part of the site and submitted to and approved in writing by the Local Planning Authority.

Informative

INF03 - SITE CONTAMINATION
Further advice on compliance with condition no. @@ may be obtained by contacting the Council's Contaminated Land Officer on 01978 298771 or 297773. Should the investigation identify contamination issues that may affect receptors other than the site users e.g. groundwater, then it is recommended that these works are also addressed in consultation with the Contaminated Land Officer prior to commencement of works on site.
