Waste Storage and Collection

Do the plans incorporate areas to store and aid the collection of waste and have arrangements been made for the separate storage and collection of recyclable waste?

- ⊘ Yes
- ◯ No

If Yes, please provide details:

Four separate wheelie bins allocated for paper/cardboard, glass, metal/plastic/cartons, non-recyclable waste will be situated at the back of the loading area, in an enclosure as shown in the example shown on 3.41 Waste Management of the DAS.
We will contract a private waste contractor to collect business recycling waste in a van-sized vehicle (up to 3.5 tonnes), as described above. Bins are located at the back of the loading area, so that a van can reverse into the loading bay on site to collect the refuse from directly behind it. Collections will be arranged at off-peak times out of office hours.
Food waste will be collected directly from the kitchen and composted on site, together with some of the paper and cardboard.
We do not anticipate needing collections very often, due to the types of businesses on site not producing commercial waste other than personal consumption and paper, and because we compost food and paper/cardboard on site.

Details of the pre-application advice received

"Following discussions with my manager, a different issue has arisen in relation to the type of application submitted which I hadn't previously appreciated.

The lawful use of the site is a mixture of A1 and B1. The proposal to limit the use to B1 (and increase the occupancy) would conflict with the original permission because it would prevent the A1 permitted use from taking place. We need a full planning application for change of use therefore, rather than the submitted variation of condition application. Apologies that I have not picked up on this sooner.

I recommend that this application is withdrawn and a full application for change of use submitted instead. My manager has agreed that we can accept 50% of the fee for the full application, to reflect the fee that you have already paid.

As part of the new planning application, a Green Infrastructure Statement (GIS) and Scheme of Net Biodiversity Benefit (NBB) is also required."
