Subject: Dynamic Bradbury Garden - Wrexham, LL13 7AS (2023)

Dynamic and surrounding properties

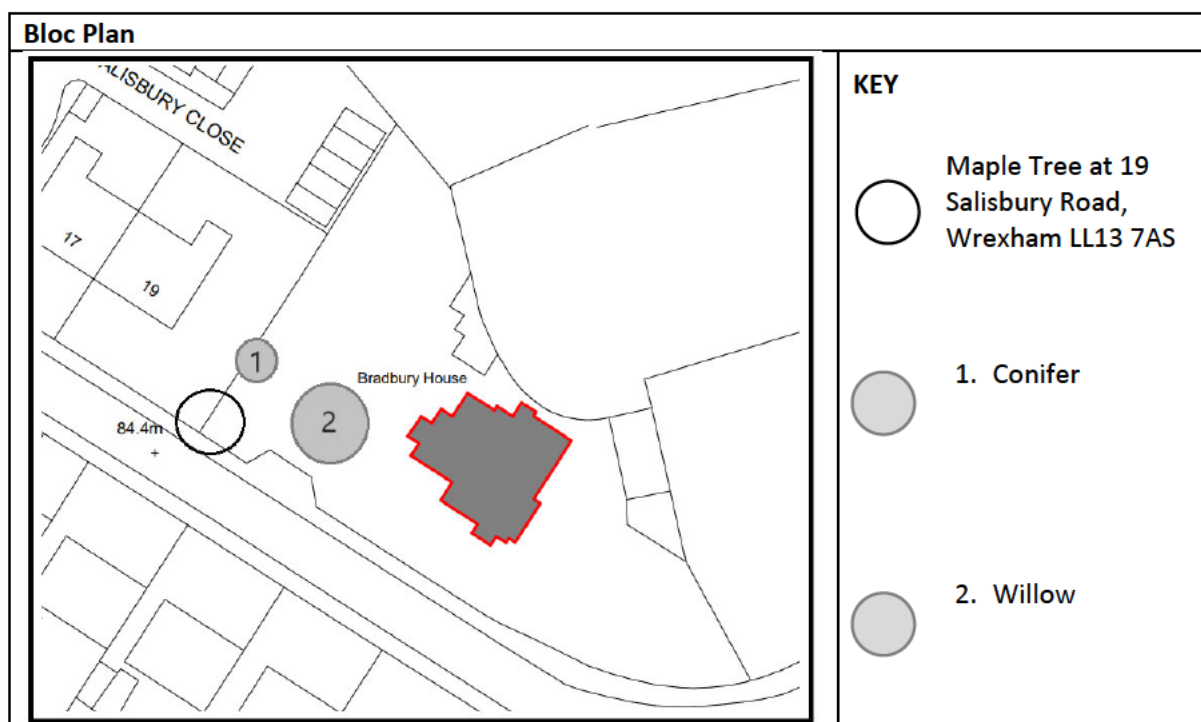

Area outlined in red

This work builds on work from the National Lottery Climate Boost project that was developed after consultation with - Renew Coordinator and - Mentor from the Wildlife Trust. We have also listened to the advice of contractors and trades people who have come out to give quotations to support the ideas and vision of the children, young people, staff, volunteers and Trustees from the charity to increase accessibility and use of the garden.

Planned Work

Item	Detail
Maintenance of Willow Tree (Bloc Plan #2)	To allow for the Willow Tree to be kept in good condition as it is considered to have a high amenity value to the charity and local community. The tree provides shade and comfort to children and young people and all users of the garden, along with a sensory experience. The charity wants to protect and preserve this tree for the public enjoyment along with its environmental and aesthetic benefits.

	Any work authorised would be completed by a qualified Tree Surgeon and outside of bird nesting season.
Removal of Conifer (Bloc Plan #2)	Removal of Tree to preserve the listed boundary wall and maintain the integrity of the newly installed paths that ensures the garden are accessible by all users and meet the requirements of the Equality Act (2010). The tree loses a large number of seed pods that shed in the garden. Many of the children and young people at Dynamic have PICA, the compulsion to eat inedible items/objects. Although not toxic, the conifer seed pods can contain compounds that can cause an upset stomachs and digestive distress. Dynamic would prefer to remove the hazard and replace it with a suitable alternative of herbs and linear orchard trees/ bushes. The tree is shadowed by the neighbouring maple tree from Property 19 Salisbury Road, Wrexham LL13 7AS. This maple tree is bordering the public footpath. Any work authorised would be completed by a qualified Tree Surgeon and outside of bird nesting season.
Linear Orchard Trees and Bushes	Dynamic Participation Group will choose trees/bushes to plant to support activity sessions. Children/young people would prefer to grow these items from juvenile plants and plant these items themselves.
