A22NA – MINOR DEMOLITION CONSTRUCTION NOISE

All works in relation to the implementation of this permission, including deliveries to and /or leaving the site, should be undertaken only between the hours of 07.30 to 18.00 Monday to Friday, 08.00 to 14.00 on a Saturday, and at no time on a Sunday or a Bank Holiday. Outside these times, any works which are audible beyond the site boundary have the potential to cause unreasonable disturbance to neighbouring premises.

The applicant is advised that the Council has the option to control construction noise by serving a Control of Pollution Act 1974, Section 60 Notice where deemed necessary, and failure to comply with such a Notice can

result in prosecution.

The applicant is further advised that any complaints received relating to noise of any type from the development may also be investigated using the Council's Standardised Procedure for Dealing with Noise Nuisance Complaints. This is done under the Statutory Nuisance provisions provided within the Environmental Protection Act 1990, and legal action may be taken where appropriate.

The applicant must adhere to the times given above wherever possible. If, however, there are urgent or unavoidable circumstances requiring work outside of the specified times, permission to proceed may be sought by contacting Environmental Health & Housing Standards at healthandhousing@wrexham.gov.uk or 01978 292040. Please use the same contact details for any other enquiries regarding construction / demolition site noise.

RPT1 - REPORT REVIEW

Report MATERIAL. EVOLUTION LTD PROPOSED CEMENT REPLACEMENT MANUFACTURING PLANT NOISE AND DUST ASSESSMENT. By Green Portal Business Solutions Ltd has considered the impact of both noise and dust:

Noise

The noise report focuses on the impact of noise on employees at CCP, whereas residential receptors are discussed this is not a focus of the report. However, confirmation has been given that the bulk of the site activities will take place indoors as is the case with the existing site occupier. It is therefore unlikely that there will be any residential disturbance. However, I recommend the noise condition limiting noise from the process to not exceeding the background.

Dust

Proposed mitigation has been presented so as to prevent dust emissions. It is also worth noting that dust emissions will be controlled under the conditions of an Environmental Permit which will be required prior to operations beginning at site.

The conclusions that neither dust nor noise are likely to adversely affect neighboring residential receptors is accepted.

The report has also confirmed that an application for an Environmental Permit has been submitted to WCBC

ZP05 - NOISE GENERATION - NOISE LEVEL CONDITION

The rating level of any noise generated by reason of this development shall not exceed the pre-existing background level at any time. The noise levels shall be determined at nearby noise sensitive premises, and measurements and assessment shall be made in accordance with BS4142:2014 Methods for Rating and Assessing Industrial and Commercial Sound.
