FAO Jenni Perkins

Dear Jenni/Highways,

Further information requested by Highways for planning application P/2024/0277.

The below answers are to the queries raised by the Highways Department as part of the consultation period for this planning application.

Clarification on the number of staff employed for the business –

The number of staff working for the business on site is generally 2, sometimes a helper is in attendance making it 3.

Maximum size/length of vehicle that will visit the site –

The van used is a standard van, 7 metres in length (there are no articulated lorries being used).

The number of daily vehicle movements the business generates to/from the site –

Movements are very minimal throughout the week as when stock is taken from the site, enough is taken for a few days.

I trust this answers all queries raised, if there is anything further we will be happy to assist.

Many thanks,

Sophie Cragg BA MSc
