

To Whom it May Concern,

This email is for the purpose of showing my unwavering support for Christmas Farm, Wrexham.

My partner and extended family have visited the farm during Halloween and the Christmas periods many times.

When visiting, we are always welcomed by a genuine group of people running the farm who not only show immense care and attention for the reindeer, but provide a wonderful, immersive experience for all.

Myself and my family are huge fans of Christmas Farm and what they intend to do with the land is perfectly reasonable.

The objections as I understand, come down to outstanding items, which I'll firstly address by asking the following question:

How can any member of council or any other governing body for that matter, make a decision on something when they are not in receipt of all facts?

It is your duty (given you work for us as public servants) to ensure you have all information relating to such matters, prior to making a full and final decision.

The river pollution concerns were already addressed and a report was submitted but (for reasons unknown) were not put in front of the committee, despite requests for it to be included.

I would like to understand the reasons why this was omitted; and I will be submitting an FOI request to the council, regardless of the final outcome as this is unacceptable - I'm sure you would agree.

My comments regarding 'pedestrian safety' are as follows: the road has already been reduced to a 40 zone and the only concern should be the state of the roads, pathways and grass verges which I believe, the council has an obligation to maintain. None of which are in a good state of repair and therefore, the farm cannot be responsible for pedestrian safety.

The proposal is a welcome attraction to the local area and I would expect that this decision be overturned, and for logic to prevail.

Regards
Miss SL Lomax
