Wrexham County Borough Council
The Guildhall
Wrexham
LL11 1AY

Dyddiad/Date: 24 October 2023

Annwyl Syr/Madam/Dear Sir/Madam,

BWRIAD/PROPOSAL: Trawsnewid garej presennol i ystafelloedd ychwanegol ar gyfer cartref gofal / conversion of existing garage to additional rooms for care home

LLEOLIAD/LOCATION: Hullah Farm, Cefn Road, Wrexham, LL13 9TT

Thank you for consulting Cyfoeth Naturiol Cymru (CNC)/Natural Resources Wales (NRW) about the above, which we received on 05 October 2023.

We continue to have concerns with the application as submitted because inadequate information has been provided in support of the proposal. To overcome these concerns, further consideration is required regarding foul drainage. Further details are provided below.

Foul Drainage and Protected Sites

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales. In line with our [Planning Advice](#) (August 2023), under the Habitats Regulations, Planning Authorities must consider the phosphorus impact of proposed developments on water quality within SAC river catchments. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

This application for conversion of garages to 2 dwellings proposes connection of foul water to the mains sewer. We note the correspondence from DCWW 04/10 and 05/10 and would advise that further confirmation is sought from DCWW with regards to the bullet points set out in section 'What this means for development proposals involving connection to public wastewater treatment works?' of our Planning Advice.

Your Authority will need to take the above into account in your determination of whether the development is likely to have a significant effect on the SAC. Should you determine that an Appropriate Assessment is required, the Applicant will then need to submit whatever evidence they deem appropriate (seeking advice from consultants as may be necessary) to demonstrate no adverse effect on site integrity. You should then consult us on your

Appropriate Assessment under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

Ultimately, the suitability of foul drainage arrangements for the proposed development is a matter for your Authority to determine.

Protected Species

We note that the bat report submitted in support of the above application (Cutmore, S., (July 2022), Protected Species Survey, Aboricultural & Ecological Services) identified that bats were not using the application site. We therefore have no adverse comments to make on the application as submitted.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully

Rachael Burke
