

To whom it may concern.

I am writing in response to the appeal about this facility.

I feel not only would it greatly enhance the residents of Llay but also the surrounding area of , now a city ,Wrexham.

Where else can residents of Llay or the surrounding area go to learn to paddleboard or use any other outdoor water facilities?

This will be a fantastic opportunity and should be encouraged. It makes a change from having great big holes dug and rubbish tips all around Llay.

In a neighbouring Flintshire village , they are having a great time using the water and wildlife facilities there.

Children and Adults have had a lovely time picking the pumpkins and watching the reindeers flourish, within the care of this very experienced Reindeer breeder.

The water and wildlife facilities he wants to enhance , would be highly beneficial to young and old alike, and many birdwatchers are already enjoying seeing the birds , but at the moment are having to do it from the road side as the car parking facilities have been rejected.

The Llay Road has needed the pavements doing for years , and I do not think that it should be the responsibility of a man trying to improve the facilities of Llay, that should be responsible for this. Surely it is the responsibility of the highways, and this should not have been one of the reasons for the rejection.

Paddle boarding has become a very popular, eco friendly, and healthy exercise, and can be relatively inexpensive, therefore everyone can take part, especially the young people of Llay.

We are looking forward to this new venture becoming another venue for Wrexham.

Yours sincerely,
H L Hough.
