Subject: Kronospan North Access Road - P/2022/1080 - Ecological Lighting Assessment and Updated Indicative Landscape Masterplan

Afternoon both

Further to our meeting a couple of weeks ago, please find attached the following documents:

- Ecological Lighting Assessment (and associated drawings) assessing the impact of proposed low level bollard lighting along the access road.
 - Please note that the majority of the remaining lighting remains as previous (noting also that the lighting columns at the northern extent of the lorry park where it meets the access road have been reduced in height from 8m to 5m and 6m to aid the transition to the low level bollard lighting.
- Amended Indicative Landscape Masterplan providing additional woodland planting immediately north of the proposed lorry park, informed by the ecological lighting assessment.
 - A table has been added to provide key NBB figures.

I trust these are along the lines of what was expected. As previously discussed, the ecological lighting assessment is for information purposes to demonstrate feasibility; we are not expecting the attached information to be subject to formal 21 day consultation.

Please let me know if you require any further information or have any queries regarding the attached.

Regards

Bobby Clayton
