PT Underground Tank Backfill:

- ☐ Concrete Backfill
- ☐ Granular Backfill (+£1,780.00 ex. VAT / +£2,136.00 inc. VAT)

PT High Level Alarm:

- ☐ Not Required
- ☐ High Level Alarm 240v (+£339.00 ex. VAT / +£406.80 inc. VAT)

Quantity:

Premier Tech Cesspools are manufactured from GRP and comply with BS4994:1987 which is the British Standard for the Specification for design and construction of vessels and tanks in reinforced plastics. Premier Tech's cesspools are supplied with pedestrian duty man lids as standard. Cesspools only have an inlet and do not have an outlet so the liquid or waste stored inside them is either removed by tanker or pumped out.

Specification:

Nominal Capacity (Litres / Gallons):		36000
		7912
Length (mm):		7784
Diameter (mm):		2500
Total Height (mm):		3500
Approx. Weight Empty (kg):		1300
Diameter of Tank Opening (mm):	600	
Number of Turrets (or necks):	1	
Pedestrian Lid:	Yes	600
Pipework Diameter (mm):	150	
Invert Depth (mm):	720	

Backfill: 1

Concrete backfill tanks **MUST** be installed with a concrete surround. Granular backfill tanks can be backfilled with either granular material or concrete subject to suitable ground conditions. Please see our installation instructions for more information.

High-Level Alarm:

As all Cesspools need emptying when they are full, a high-level alarm warns you that the tank needs emptying before it overflows or the waste backs up the pipework.
