Good afternoon,

Regarding the report provided for the Archaeological Watching Brief (Now known as an Archaeological Monitoring and Recording (AMaR)) on the application referenced above.

I replied to the original WSI provided, stating that the information would not meet the required standards. I emailed the contractor, with the current guidelines, and even tried to call them on the 7/2/24, but to no avail.

I have added the report provided by the contractor to the attachments to this email, and I am sure you will agree, no attempt has been made to meet the recommended standards.

The report cannot be added to the HER in this format and will need various alterations which include Data Management Plan, Selection Strategy, archive statement, scaled photographs and various other information (See AMaR guidance).

The contractor should have provided a WSI with the correct information before starting work on the site, and this will also require updating to the correct standard before that part of the condition is met.

Kind regards,

Neil
