Dyddiad/Date: 24 January 2024

Annwyl Syr/Madam/Dear Sir/Madam,

BWRIAD/PROPOSAL: Estyniad unllawr l ochr a chefn yr eiddo a estyniad ir balconi presennol / single storey side and rear extension and extension of existing balcony

LLEOLIAD/LOCATION: Aqueduct Inn, Gate Road, Froncysyllte, Wrexham, LL20 7PY

Thank you for consulting Cyfoeth Naturiol Cymru (CNC)/Natural Resources Wales (NRW) about the above, which we received on 05 January 2024.

We have concerns with the application as submitted because inadequate information has been provided in support of the proposal. To overcome these concerns, further consideration is required regarding foul drainage. Further details are provided below.

Protected Sites - Foul Drainage

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales. In line with our [Planning Advice](#) (August 2023), under the Habitats Regulations, Planning Authorities must consider the phosphorus impact of proposed developments on water quality within SAC river catchments. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

This application proposes connection of foul water to the mains sewer. We note the consultation response letter from DC/WW dated 08/01/2024. If your Authority deems the proposal would increase the volume of foul discharge from the site, we advise that further confirmation is sought from DC/WW with regards to the bullet points set out in the section 'What this means for development proposals involving connection to public wastewater treatment works?' of our [Planning Advice](#).

Should you conclude that the proposed development is likely to have a significant effect on the SAC, please consult us on your Appropriate Assessment under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

Ultimately, the suitability of foul drainage arrangements for the proposed development is a matter for your Authority to determine.

Protected Species

We note that there is no information about protected species with the application and, therefore, are assuming that your Authority has screened the application and concluded that there is not a reasonable likelihood of protected species being present.

Designated Landscape

The development is situated within the Clwydian Range and Dee Valley Area of Outstanding Natural Beauty (AONB). We note that there is no information regarding landscape assessments with the application and therefore, we are assuming that your Authority has screened the application and concluded that any impacts on landscape are unlikely and the proposal is in line with Planning Policy Wales (PPW 11) [Planning policy Wales GOV.WALES](https://gov.wales/planning-policy-wales). If you require further advice, then please reconsult us.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully,

Rachael Burke
