

I wish to strongly object to the proposed 5G mast together with cabinets, The proposed site is in an area of residential apartments mainly occupied by older people. The position of the mast on a busy corner used by these older people many of whom use walking aids, ie mobility scooters, could be a hinderance. The road that is proposed is also the gateway to our lovely Erddig Hall, that people from all over Britain come to visit, what an awful eye sore for these people to have to pass, a 55 foot pole plus cabinets.

I am not against a mast but please erect it somewhere where it's not so obvious, there is a big green field across the road where I'm sure it could go and blend in with the trees and greenery.

There is a strong opposition from residents of the flats in close proximity of the proposed site , many who don't have internet facilities and cannot voice their opinions on line, would you please consider the well fair of these people.

Many residents of Coed y Glyn Estate are in favour of this mast, as long as it's not by their properties, as they do not want an eye sore of a 55 foot mast by their houses devaluing their property, but it's fine for it to be put by older residents property. There is a large green area right in the middle of their estate can I please suggest you erect the mast their which will then give them better reception that they crave.

Many thanks

Rob and Lynn Gabriel
