Dear Sir/Madam,

BWRIAD / PROPOSAL: ADEILADU ANNEDD / ERECTION OF DWELLING

LLEOLIAD / LOCATION: LAND ADJACENT TO, 38 AND 40 HAZEL GROVE, WREXHAM, LL12 7YN

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 26 October 2022.

We have concerns with the application as submitted because inadequate information has been provided in support of the proposal. To overcome these concerns, you should seek further information from the applicant regarding foul drainage. If this information is not provided, we would object to this planning application. Further details are provided below.

Foul Drainage and Protected Sites

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales. In line with our [Planning Advice](#) (July 2022), under the Habitats Regulations, Planning Authorities must consider the phosphorus impact of proposed developments on water quality within SAC river catchments. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

We note from the information submitted that the development has the potential to increase the amount of phosphorus being discharged from the site. As such, we refer you to our Planning Advice and advise you to seek further information from the applicant. We note that information has already been submitted in respect of confirming that the foul drainage will connect to the mains public sewer. However, we advise you to seek further information as

identified in the section titled 'What does this mean for development proposals involving connection to public wastewater treatment works' of that advice.

Provided this advice is followed and you are able to conclude that the development is not likely to have a significant effect on the SAC, we would have no objection to the proposal. However, should you conclude that the proposed development is likely to have a significant effect on the SAC, please consult us on your Appropriate Assessment under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

Protected Species

We note that the ecological report submitted in support of the above application (Knight, T., July 2021, Preliminary Ecological Appraisal, Marches Ecology Ltd) has identified that bats are not present at the application site.

However, the report identifies that two trees on site may offer limited potential for roosting bats and Section 5.1.2 gives recommendations for temporary protective tree fencing and accordance with best practice guidance for any external lighting, to avoid potential impacts on bats both during construction works and the completed development. We recommend these measures are appropriately secured in any future consent to the satisfaction of your Authority.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully,

Rachael Burke
