Dyddiad/Date: 02 January 2024

Annwyl Syr/Madam/Dear Sir/Madam,

BWRIAD/PROPOSAL: Two storey rear extension

LLEOLIAD/LOCATION: West View, Overton Road, Marchwiel, Wrexham, LL13 0TE

Thank you for consulting Cyfoeth Naturiol Cymru (CNC)/Natural Resources Wales (NRW) about the additional information regarding the above, which we received on 11 December 2023.

We continue to have concerns with the application as submitted. However, we are satisfied that these concerns can be overcome if the documents identified below are included in the approved plans and documents condition on the decision notice:

- West View, Marchwiel; Reasonable Avoidance Method Statement for Great Crested Newts. Enfys Ecology. 25/01/2022.
- West View, Marchwiel; Bat and Nesting Bird Survey by Enfys Ecology, dated 10/09/2022.

Protected Species

Great Crested Newts

We note that the ecology report submitted (West View, Marchwiel; Reasonable Avoidance Method Statement for Great Crested Newts. Enfys Ecology. 25/01/2022) identifies that there is a risk of Great Crested Newts (GCN) being present at the application site.

GCN and their breeding and resting places are protected under the Conservation of Habitats and Species Regulations 2017 (as amended). Where GCN are present and a development proposal is likely to contravene the legal protection they are afforded, the development may only proceed under licence issued by Natural Resources Wales, having satisfied the three tests set out in the Regulations (please also refer to Paragraph 6.3.7 of Technical Advice Note 5: Nature Conservation and Planning). Please note, for the purposes of providing advice at the planning application stage, our comments are limited to the test relating to

“demonstration of no detriment to the maintenance of the favourable conservation status of European protected species”.

We consider that the development is not likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in their natural range. However, we advise that the proposed development is likely to harm or disturb the GCN or their breeding sites and resting places at this site and, therefore, we advise that all avoidance and mitigation measures described in the RAMs report must be undertaken.

The report must be included in the ‘approved list of plans / documents’ condition within the decision notice should consent for the project be granted.

Bats

We note that the bat report submitted in support of the above application (West View, Marchwiel; Bat and Nesting Bird Survey by Enfys Ecology dated 10/09/2022) has identified that bats are present at the application site. From the information submitted, we consider that the proposed development represents a lower risk for bats, as defined in our guidance document ‘*Natural Resources Wales Approach to Bats and Planning (2015)*’.

Bats and their breeding and resting places are protected under the Conservation of Habitats and Species Regulations 2017 (as amended). Where bats are present and a development proposal is likely to contravene the legal protection they are afforded, the development may only proceed under licence issued by Natural Resources Wales, having satisfied the three tests set out in the Regulations (please also refer to Paragraph 6.3.7 of Technical Advice Note 5: Nature Conservation and Planning). Please note, for the purposes of providing advice at the planning application stage, our comments are limited to the test relating to “*demonstration of no detriment to the maintenance of the favourable conservation status of European protected species*”.

As this is a lower risk case for bats, we consider that the development is not likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in their natural range. However, we advise that the proposed development is likely to harm or disturb the bats or their breeding sites and resting places at this site and, therefore, we advise that all avoidance and mitigation measures described in the bat report must be undertaken.

The report must be included in the ‘approved list of plans / documents’ condition within the decision notice should consent for the project be granted.

Please consult us again if any further information shows that this is no longer a lower risk case.

NRW would refer the Local Authority to the Chief Planning Officer’s letter dated 01 March 2018 which advises Local Planning Authorities to attach an informative regarding licence requirements to all consents and notices where European Protected Species are likely to be present on site.

Protected Sites – Foul drainage

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales.

In line with our [Planning Advice](#) (August 2023), under the Habitats Regulations, Planning Authorities must consider the phosphorus impact of proposed developments on water quality within SAC river catchments. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

We note the application, as submitted, proposes a 2-storey domestic extension including loft conversion, i.e. an extension to a dwelling house comprising a single household. We refer you to our Planning Advice and the section titled 'What does this mean for domestic extensions?'

Ultimately it is a matter of judgment for you, as Competent Authority, to satisfy yourselves that the proposed development will not result in a significant effect on the SAC. Therefore, should your Authority conclude that the proposal is likely to have a significant effect on the Dee and Bala Lake SAC, please consult us on your Appropriate Assessment under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully,

Rhys Jones
