

TREE PLANTING

- Hawthorne - Crataegus monogyna (8 no.)
- Holly - Ilex aquifolium (8no.)
- Mountain Ash - Sorbus aucuparia (8 no.)
- Hornbeam -Carpinus betulus (8 no.)

TREE PLANTING

Bare root saplings min. 2m tall to be planted between November and April.
Heavy duty tree guards 1200mm - self supporting, split lengthways to fit around trunk.

Maintenance
Saplings to be regularly watered and weeded. Any natural losses to be replaced within the first 5 years.
Protective tree guards to be checked on a regular basis and replaced if necessary.
