

Dear Sir/madam

I am writing a letter on behalf of my mother who lives at the address of 123 Percy Rd Wrexham , right next to where you propose to install a 17 meter high telecommunications pole and cabinets.

My mum feels very strongly that it is too close to her flat, which is going to be an eyesore from all her windows and outlook and also any health concerns that come with the mast. She is also concerned about the noise from the cabinets, as they will be very close to her bedroom.

There are certainly other places in the area that the mast could be put , where it's not so imposing.

This area is home to a lot of elderly people , where it can cause obstruction to people in wheelchairs . Also it's on a corner of a busy junction where there could be a blind spot for pulling out.

This is causing considerable upset to my mum who is in her latter years of life and thought living in this lovely area which houses a lot of the older generation, she would live here stress free

She is hoping you will reconsider the planning of the above and regard her strong concerns in this matter

I would also like a copy of the appeal decision letter.

Kind Regards

Louise Lewis.
