Hello Gwyn

Just to confirm the 4.8m annotation is made and we can confirm that the entire driveway is this width.

We can also confirm that no gates will be installed and are not shown on any of the proposed plans.

The attached plan illustrates not just eth width but also the existing and proposed splays which show that the desired splay can be achieved.

The key difference between the two however is that eth proposed access is considered to be located at a point that will enhance highway safety.

I trust that this is satisfactory and look forward to receiving a positive determination.

Kind regards

Justin
