

Dear David

Thank you for your letter advising me of the appeal for planning to be granted for 5G telecommunications pole and cabinets on Percy Road and Stockwell Grove.

I believe the appeal should be granted, in this area and many parts of Wrexham telecom and data services are very poor and as a City going forward it is vital we have a 5G service.

In the proposed area there are already a number of cabinets already sited by BT and Virgin media, also CCTV cameras on posts, I can't see how a much needed service for 5G should be refused in this area.

With so much potential in Wrexham as a City, 5G should be a minimum standard for data service and these applications should be supported.

Yours sincerely

Richard Moulton
