| Tree No./Location               | Issue             | Comments                                                                                                                                                                                               | Recommendations/Further Action                                               |
|---------------------------------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|
| Trees T1 – T5, G1, T1755 - 1772 | Tree Protection   | Tree protection measures have been installed in accordance with the approved plan to the precise coordinates. Signs placed to remind of importance of area.                                            | Additional bracing to ensure fence does not fall over.                       |
| Trees T1755 - 1772              | Tree Work         | Additional tree works required before site handed over. Trees 1764 and 1768 have died and require to be removed. Trees 1759 and 1765 have storm damage.                                                | Undertake tree works before year end 2021. Tree Work Specification attached. |
| Trees T1755 - 1772              | No dig path       | Date to be advised of the installation of no dig path for watching brief.                                                                                                                              | Advise date of installation.                                                 |
| Trees T1755 - 1772              | Nettles and grass | Nettles and grass within RPA area require treatment before hand over. Grass requires to be frequently mown to give a height of between 25mm and 50mm. Nettles need to be treated to prevent re-growth. | Maintain grass in RPA area and treat nettles.                                |
