FAO Planning Officer

My name is Paul Griffiths I live near the proposed building development. I would like to strongly object to the above application for the following reasons.

- 1: The village has poor land drainage and a high water table. When we have heavy rain the land around the proposed site including the land near my house floods due to poor drainage. I have photos and a video showing the severity of this problem if required.
- 2: Cadney Lane which is the road that leads to the proposed site is very narrow with no footpaths and no street lighting which can be dangerous to pedestrians walking especially at night.
- 3: There are far too many houses in the village with cess or septic tanks, these pose a pollution risk to nearby streams and the environment. In my opinion there should be no more houses built until there is a proper drainage and sewage system in place.

Many thanks
Paul Griffiths
