

As a resident near the planned site I fully support the application. Mobile signal around here is notoriously poor and this will bring us into the 21st century for connectivity. I often have to work from home and struggle for mobile reception to pick up calls. On top of this, if my Wi-fi ever drops out trying to connect via data is a no-go. Granting this application will alleviate these problems.

I also don't agree with earlier objections that the unit would be a blight on the landscape and the view of residents as the only view it would potentially obscure is that of a tarmac toad full of pot holes!

Thanks
Richard Purton
