Proposed changes – removal of hedge & replace with fencing.

Description of work:

Remove hedge and replace with wooden fencing. Construction of fencing will include use of concrete posts & gravel boards as required to support the wooden fence panels. A picture showing a similar construction to the intended fence is shown below:

Height of the fence to be a maximum of 1m at the front of the property (A in diagram below), rising to a maximum of 2.134m (7 ft) at the rear of the property (B in diagram below). The intended change in height will occur through zone C in a stepped manner. Height measurements are from kerb. Height of fence is required to maintain our privacy.
