Denbighshire

Published 1879

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the time adopted for England, Wales and Scotland in the 1840's. In 1854 the Ordnance Survey began to publish maps of the British Isles, which were used to update the 1:10,560 maps. The published date of the maps are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Published 1900

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for *Oxford, Wales and Scotland* in the 1940's, i.e. in 1854 the 1:42,500 scale was used for mapping both areas; these maps were often updated every 6-10 years. The first edition of the Welsh map was issued in 1950, and the OS maps were updated more frequently than those of Wales. Before 1938 all OS maps were based on the Cassini Projection, though later editions of some of the counties or group of counties, giving rise to significant inaccuracies in surveying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection.
