Architectural section drawing of a building facade, showing a grid of windows and doors. The drawing is oriented vertically on the page. It features a dark, textured upper section, a central grid of windows with a small square window above it, and a lower section with a large window and a door. The drawing is annotated with various labels and dimensions.

Architectural section drawing of a building facade. The drawing shows a cross-section of a building with various materials and window types. The drawing is divided into several horizontal sections. The top section is a dark, textured roof. Below the roof is a section with a dark, textured wall. The main section of the building is a large, rectangular area with horizontal wood grain. There are several windows in this section: a large window on the left with a white frame, a smaller window on the right with a white frame, and a window on the left with a dark frame. Below the main section is a section with a dark, textured wall. The bottom section is a dark, textured base. A vertical section with a cross-hatch pattern is visible on the right side. Callouts with diamond symbols (P) point to different materials and components.

This architectural section drawing illustrates a building facade with a complex arrangement of materials and structural components. The drawing is oriented vertically, with a horizontal line at the top representing the ground level. The facade is composed of several distinct sections: a dark, textured base; a central section with horizontal wooden slats; and a top section with a dark, textured surface. Various structural elements are shown, including vertical supports, horizontal beams, and a central vertical column. The drawing uses a variety of hatching and shading techniques to represent different materials and textures. On the right side, there are several diamond-shaped callouts with numbers, likely indicating specific materials or construction details. The overall style is technical and precise, typical of architectural drawings.
