Annwyl Syr/Madam / Dear Sir/Madam,

BWRIAD / PROPOSAL: GOSOD CYFLEUSTER TRIN CARTHION BIO-DISC BA GYDA GOLLYNGFA IR DRAEN STORM BRESENNOL / INSTALLATION OF BIO-DISC BA SEWAGE TREATMENT PLANT WITH OUTFALL TO EXISTING STORM DRAIN

LLEOLIAD / LOCATION: PENLEY MILL, LIONS LANE, PENLEY, WREXHAM, LL13 0LY

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 18/05/2023.

We have concerns with the application as submitted because inadequate information has been provided in support of the proposal. To overcome these concerns, further consideration is required regarding foul drainage. Further details are provided below.

Protected Sites and Foul Drainage

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphate levels for all river SACs across Wales. In line with our [Planning Advice](#) (July 2022), under the Habitats Regulations, Planning Authorities must consider the phosphorus impact of proposed developments on water quality within SAC river catchments. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

We note from the information submitted that a private sewage treatment system discharging wastewater to a watercourse (via storm drain) is proposed. The information set out in the section of our Planning Advice titled 'What does this mean for development proposals involving private sewerage treatment systems' has been submitted with the application. We therefore advise your Authority to undertake a Habitats Regulations Assessment (HRA). Should you determine that an Appropriate Assessment is required, the Applicant will then

need to submit whatever evidence they deem appropriate (seeking advice from consultants as may be necessary) to demonstrate no adverse effect on site integrity. You should then consult us on your Appropriate Assessment under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

We advise the Applicant make use of our [pre-application advice service prior to applying for an Environmental Permit](#), to try to ensure that there is no conflict between any planning permission granted and the permit requirements. It is important to note that a grant of planning permission does not guarantee that a permit will be granted, should a proposal be deemed to be unacceptable (either because of environmental risk or because upon further investigation, a connection to mains sewer was feasible). The Applicant should ensure that they have all the required permissions, consents, permits and any other approvals in place prior to commencement of works on the site.

More information, including a step by step guide to registering and the relevant application forms are available on our [website](#). Where private sewage treatment/disposal facilities are utilised, they must be installed and maintained in accordance with British Standard 6297 and Approved Document H of the Building Regulations. We also refer the Applicant to Guidance for Pollution Prevention 4 on the [NetRegs website](#), which provides further information.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully,

Pauline Gallagher Brown
