Annwyl Syr/Madam / Dear Sir/Madam,

BWRIAD / PROPOSAL: DEMOLITION OF EXISTING DWELLING AND ERECTION OF REPLACEMENT DWELLING

LLEOLIAD / LOCATION: SILVERDALE, TAINANT, PEN Y CAE, WREXHAM, LL14 1UG

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 18/07/2022.

We have concerns with the application as submitted. However, we are satisfied that these concerns can be overcome if the document identified below is included in the approved plans and documents condition on the decision notice:

Marches Ecology, November 2021. Proposed Replacement Dwelling, Silverdale, Tainant, Penycae, Wrexham, LL14 1UG – Ecological Appraisal. Ref C470/ EA/ 1.0

Please note, without the inclusion of this document we would object to this planning application. Further details are provided below.

Protected Species

We note that the bat report submitted in support of the above application (Marches Ecology, November 2021) has identified that bats are present at the application site. From the information submitted, we consider that the proposed development represents a lower risk for bats, as defined in our guidance document '*Natural Resources Wales Approach to Bats and Planning (2015)*'. Bats and their breeding and resting places are protected under the Conservation of Habitats and Species Regulations 2017.

As this is a lower risk case for bats, we consider that the development is not likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in its natural range. However, we advise that the proposed development is likely to harm or disturb the bats or their breeding sites and resting places at this site and, therefore, we advise that all avoidance and mitigation measures described in the bat report must be undertaken.

The report must be included in the 'approved list of plans / documents' condition within the decision notice should consent for the project be granted.

Please consult us again if any further information shows that this is no longer a lower risk case.

NRW would refer the Local Authority to the Chief Planning Officer's letter dated 01 March 2018 which advises Local Planning Authorities to attach an informative regarding licence requirements to all consents and notices where European Protected Species are likely to be present on site.

Protected Sites – Foul Drainage

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales. In line with our [Planning Advice](#) (July 2022), under the Habitats Regulations, Planning Authorities must consider the phosphorus impact of proposed developments on water quality within SAC river catchments.

However, the application as submitted is unlikely to increase the amount of phosphorus entering the catchment. Therefore, we are satisfied that the proposal is not likely to have a significant effect on the River Dee and Bala Lake SAC.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully

Garmon Lewis
