Annwyl Syr/Madam / Dear Sir/Madam,

BWRIAD / PROPOSAL: Estyniad i uned ddiwydiannol / Extension to industrial unit

**LLEOLIAD / LOCATION: DRAGON HYDRAULICS, UNIT 3 ABBEY ROAD NORTH,
WREXHAM INDUSTRIAL ESTATE, WREXHAM, LL13 9RX**

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 12.10.2022.

We have no objection to the proposed development as submitted and provide the following advice.

Protected Sites – Foul Drainage

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales. In line with our [Planning Advice](#) (July 2022), under the Habitats Regulations, Planning Authorities must consider the phosphorus impact of proposed developments on water quality within SAC river catchments. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

However, recognising the specific nature of the application submitted for a small extension to an existing industrial building, and on the basis of the E-mail from the planning case officer (dated 19.10.22) stating no expected increase in the amount of phosphorus discharged from the site, we are satisfied that it is unlikely to increase the amount of phosphorus entering the catchment. Therefore, we are satisfied that the proposal is not likely to have a significant effect on the River Dee and Bala Lake SAC.

Flood Risk

The planning application proposes less vulnerable development involving an extension to an industrial unit. The application site falls within Zone C2 of the Development Advice Map (DAM) contained in TAN15 (2004).

However, at this location the Flood Map for Planning (FMfP) is the best available information on flood risk. The FMfP identifies the application site to be in Flood Zone 1, meaning there is less than a 0.1% chance of flooding in a given year.

On this basis, we have no objection to the application as submitted.

Protected Species

We note that there is no information about protected species with the application and, therefore, are assuming that your Authority has screened the application and concluded that there is not a reasonable likelihood of protected species being present.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully

Sara Thomas
