- Private Sewer Transfer
- Lateral Drain
- Inspection Chamber

NB: Sewer symbol colour indicates the type.

- RED - Combined
- GREEN - Surface Water
- BROWN - Foul

Route: - Greenwater S15 (sewers for individual properties only)

Notes:

Whilst every reasonable effort has been taken to correctly record the pipe material of DCWW assets, there is a possibility that in some cases pipe material (other than Asbestos Cement or Pitch Fibre) may be found to be asbestos cement (AC) or Pitch Fibre (PF). It is therefore advisable that the possible presence of AC or PF pipes be anticipated and considered as part of any risk assessment prior to excavation.

Deli-Cyrus Oryngberg ("Company") gives the information as to the position of its underground apparatus by way of general purpose only and on the strict understanding that it is based on the best information available and no warranty as to correctness is relied upon in the event of excavations or other works made in the vicinity of the Company's apparatus. The onus of locating apparatus before carrying out any excavations was entirely on you. The information which is supplied by the Company is done so in good faith and is true and correct as far as it goes. It may be noted that in 1960 I was issued a subpoena from the City of New York dated 1959 which required me to produce documents relating to the 1959 report which I had prepared in 1959. I have been advised that the subpoena was set aside because the City of New York did not believe that the information was relevant. In 1987 I was issued a subpoena from the City of New York dated 1987 which required me to produce documents relating to the 1987 report which I had prepared in 1987. I have been advised that the subpoena was set aside because the City of New York did not believe that the information was relevant. In 1991 I was issued a subpoena from the City of New York dated 1991 which required me to produce documents relating to the 1991 report which I had prepared in 1991. I have been advised that the subpoena was set aside because the City of New York did not believe that the information was relevant.

The foregoing information is entirely without prejudice to the provision of the New Roads and Street Works Act 1991 and the Company's right to be compensated for any damage to its apparatus.

Service sites are not necessarily shown but their existence should be anticipated.

Service sizes are not generally shown but their presence should be anticipated.

EXACT LOCATIONS OF ALL APPARATUS
TO BE DETERMINED ON SITE.
