18/07/2022

Dear Sir/Madam,

PROPOSAL: FORMATION OF MANEGE

LOCATION: TRESAITH, PLAS BENNION ROAD, PENYCAE, WREXHAM

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales with additional information about the above, which we received on 05/07/2022.

We continue to have concerns with the application as submitted. However, we are satisfied that these concerns can be overcome by attaching the following conditions to any planning permission granted:

Condition 1: Protected Species (Great Crested Newt)

Condition 2: Biosecurity

Please note, without the inclusion of these conditions we would object to this planning application. Further details are provided below.

Protected Species

Great Crested Newt (GCN)

We have reviewed the Great Crested Newt Mitigation Strategy prepared by Mr Robert Thorne of Churton Ecology, dated 04/07/22.

The Great Crested Newt Mitigation Strategy does not appear to have considered water features functioning as resting places as opposed to breeding sites. However, on this occasion, we concur with the statement that further survey as per published guidelines is not likely to materially inform avoidance and mitigation measures.

GCN and their breeding and resting places are protected under the Conservation of Habitats and Species Regulations 2017 (as amended).

We advise that any consent is subject to the imposition of the following condition in respect of GCN. Provided this advice is compliantly implemented, we consider that the proposed development is not likely to be detrimental to the maintenance of the favourable conservation status of the local population of GCN present at this site.

Condition 1: No development shall commence until a GCN Method Statement has been submitted to and approved in writing by the Local Planning Authority. The Method Statement should include, but not necessarily be limited to:

- the submission of details and plans concerning GCN reasonable avoidance and mitigation measures including one-way amphibian fencing around the perimeter of the working area;
- details of timing, phasing and duration of construction activities and conservation measures;
- a timetable for implementation demonstrating that works are aligned with the proposed phasing of the development; and
- persons responsible for implementing the works.

The Method Statement shall be carried out in accordance with the approved details.

Justification: To ensure that an approved GCN Method Statement is implemented, which protects GCN affected by the development.

NRW would refer you to the Chief Planning Officer's letter dated 1 March 2018 which advises Local Planning Authorities to attach an informative regarding licence requirements to all consents and notices where European Protected Species are likely to be present on site.

Bats

We note that the Ecological Impact Assessment report submitted in support of the above application has identified that bats were not using the application site. We therefore have no comments to make on the application as submitted regarding bats.

Biosecurity

We consider biosecurity to be a material consideration owing to the nature and location of the proposal. In this case, biosecurity issues concern invasive non-native species (INNS) and diseases.

We therefore advise that any consent includes the imposition of a condition requiring the submission and implementation of a Biosecurity Risk Assessment to the satisfaction of the LPA.

We consider that this assessment should include:

- (i) appropriate measures to control any INNS on site; and
- (ii) measures or actions that aim to prevent INNS being introduced to the site for the duration of construction and operational phases of the scheme.

Condition 2: No development, including site clearance, shall commence until a Biosecurity Risk Assessment, and Method Statement that considers invasive non-native species and specific diseases (e.g. Chytrid) has been submitted to and approved in writing by the Local Planning Authority. The risk assessment shall include measures to prevent the introduction of and where present control, removal or for the long-term management of invasive species both during construction and operation. The risk assessment shall consider landscaping and other related plans. The Biosecurity Risk Assessment shall be carried out in accordance with the approved details.

Justification: To ensure that an approved Biosecurity Risk Assessment is implemented to secure measures to prevent or control the spread and effective management of any invasive non-native species and listed diseases at the site.

Protected Sites

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). As you are aware, on the 21st January 2021, we published an evidence package outlining phosphorus levels for all river SACs across Wales. As part of this package, we issued a [Planning Position Statement](#), in which we advised that any proposed development that might increase the amount of phosphate (or phosphorus) within a river SAC catchment could lead to damaging effects to the SAC. Therefore, such proposals should be screened through a Habitats Regulations Assessment (HRA), to determine whether they are likely to have a significant effect on the SAC.

However, recognising the specific nature of the application submitted, we are satisfied that it is unlikely to increase the amount of phosphorus entering the catchment. Therefore, we are satisfied that the proposal is not likely to have a significant effect on the River Dee and Bala Lake SAC.

Other Matters

Our comments above only relate specifically to matters included on our checklist, Development Planning Advisory Service: Consultation Topics (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details. If you have any queries on the above, please do not hesitate to contact us.

Yours faithfully,

Tristan Williams
