

P/2022/0538 Proposed garage, Hafodty, Church Street, Rhos LL14 2BP

Hi Simon

Thanks for the email, I have attached an updated drawing with the roof height shown. Apologies for the confusion on the doors – they did look like patio doors but they are actually side hung timber garage doors. I have added a bit more detail to them to make them look more like garage doors. The 2 windows are just to let a bit of light in while the client is working – he is a bit of a car enthusiast so the garage is to allow him to work on his car collection. It won't be for living accommodation.

The height of the roof is higher than standard just to allow us to install a 2 post car lift.

I will go to site over the weekend and take some photographs, then send them over on Monday.

Many thanks,
Geraint
