Executive Summary

This report has been prepared by Mandy Cartwright (Independent Ecologist) and Kim Norman (Independent Ecologist, CIEEM), on behalf of Mr Jones. It provides an assessment of potential ecological effects associated with a proposed extension onto a current building. The existing storage building size is approximately 1350 SQM and the proposed extension will be Approximately 850 SQM. The proposed extension will be to the rear of the current building.

Great crested newts are known to be present within the surrounding area, with waterbodies present within 300 metres of the Site; which have GCN records. Habitats within the Site provide some foraging opportunities as well as potential places that could be used for shelter and refuge. A detailed Method Statement for the protection of great crested newts during the construction phase will be agreed in consultation with Natural Resources Wales (NRW) and Wrexham County Borough Council. Works will proceed either under Reasonable Avoidance Measures (RAMs) or under a European Protected Species derogation licence granted by NRW if required. In either case, it is considered that with such measures in place, the proposed development will have no likely significant effects on the favourable conservation status of this species.

There will be no impacts on any site designated for nature conservation.

Providing the implementation of the proposed mitigation, the potential for adverse impacts on protected and notable species or habitats is considered to be negligible.

Recommendations have been given for enhancing biodiversity within the site such as wildlife friendly native planting of a hedgerow to connect with Ffordd Marlborough road nature site, seeding wildflowers on the remaining grassland within the development site, creation of an artificial amphibian hibernacula and the placement of bird and bat boxes.

The assessment concludes that there are no other ecological constraints to the proposed development site.

1.0 Introduction

1.1 We were commissioned in July, 2018 by Mr Roberts to undertake an ecological assessment of the area of land at the rear of his property off Abbey Road south, Wrexham Industrial Estate.

1.2 An extension to a current building is proposed to provide extra storage space for his business.

1.3 This report presents baseline information on habitats and ecological features both within the Site and the immediate surrounding area. The potential presence of protected species and habitats and sites of nature conservation interest is identified and considered in relation to the proposed development.

1.4 The following tasks were completed to inform the assessment

- Desk top study
- Phase 1 habitat survey
- Internal and external assessment of the onsite building for bat roosting potential

1.5 The objectives of this report are to;

- Detail the methods and results of the above surveys;
- Identify features of ecological value within the site and within the wider zone of influence and then any potential constraints for the proposed renovation
- Provide recommendations to avoid or, where this is not possible, mitigate potential impacts and thereby maintain net biodiversity value.

2.0 Site Description

2.1 The central grid reference of the proposed development site is SJ38544964. The survey area and site context is shown in figure 1.

2.2 The site is located within Wrexham Industrial Estate.

Figure 1: Site Location.

3.0 Methods

Desk Study

3.1 Designated sites and protected and notable habitats and species within 1km of the site, were identified by reviewing publically available information and records obtained from the local record centre, as listed in Table 2.

3.2 The desk study included a review of relevant policy and guidance and sought to identify any statutory designated sites for nature conservation through a review of the Multi Agency Geographic Information for the Countryside (MAGIC)¹. An information request was also

3.3 The following data search parameters, from the Site were used:

- Records of protected and notable species and habitats within a 1km radius; and,
- Statutory and non-statutory designated sites within a 1km radius.

3.4 Relevant policies from the local plan(s) relating to biodiversity were also identified. See table 1.

Table 1 – legislation and planning policy

European	
• Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (hereafter referred to as the ‘Habitats Directive’); and, • Directive 2009/147/EC of the European Parliament and of the Council on the conservation of wild birds (codified version of Directive 79/409/EEC as amended) (hereafter referred to as the ‘Birds Directive’).	
National	
• The Conservation of Habitats and Species Regulations 2017, (the ‘Habitat Regulations’); • The Wildlife and Countryside Act 1981 (as amended); • The Environment (Wales) Act 2016; • Countryside and Rights of Way Act 2000; • Protection of Badgers Act 1992; • Hedgerow Regulations 1997 • Natural Environment and Rural Communities (NERC) Act (2006); • The National Planning Policy Framework (NPPF) (July 2018); • ‘Birds of Conservation Concern 4’ (Eaton <i>et al.</i>, 2015)²; • The United Kingdom Biodiversity Action Plan (UK BAP); • The Bat Conservation Trust - <i>Bat Surveys for Professional Ecologists: Good Practice Guidelines (3rd Ed.)</i>. (Collins <i>et al.</i>, 2016³); and • BS 42020:2013 Biodiversity – Code of Practice for Planning and Development.	
Local	
• Wrexham’s Unitary Development Plan 1996 – 2011; • The Wrexham local Development Plan 2 (LDP2) 2013 to 2028; • Wrexham’s Biodiversity Action Plan; • Wrexham Biodiversity Checklist⁴; and, • Options for GCNs in Wrexham: Comparative impact modelling to inform planning (Fletcher & Wilkinson, 2013⁵).

Habitats survey

3.5 A habitat survey was completed in June, 2018. The survey was completed to the standard phase 1 habitat survey method (JNCC 2010) Incidental evidence of protected or invasive species was noted during the survey. The site was also assessed for its potential to support protected species. Weather during the survey was dry and overcast.

Fauna

3.6 During the habitat survey, the habitats present were assessed for their potential to support species of conservation concern, particularly statutorily protected species, Section 41 or Local BAP priority species

3.7 During the Phase 1 survey, the habitats present were assessed for their potential to support species of conservation concern, particularly statutorily protected species or species covered under Section 7 (S7) of the Environment (Wales) Act.

3.8 A ground based bat assessment of the building was also undertaken on site. Evidence of cracks, crevices or other features suitable to support roosting bats was searched for with the use of high powered binoculars where necessary.

3.9 The criteria for roost assessment for trees and buildings is listed below.

- Negligible - Negligible habitat features on site likely to be used by roosting bats.
- Low - A structure or tree with one or more potential roost sites that could be used by individual bats opportunistically.
- Moderate - A structure or tree with one or more potential roost sites that could be used by bats due to their size, shelter, protection, conditions and surrounding habitat but unlikely to support a roost of high conservation status.
- High - A structure or tree with one or more potential roost sites that are obviously suitable for use by larger numbers of bats on a more regular basis and potentially for longer periods of time due to their size, shelter, protection, conditions and surrounding habitat.

Limitations

3.10 It should be noted that whilst every effort has been made to provide a comprehensive description of the site, no investigation can ensure the complete characterisation and prediction of the natural environment.

4.0 Results

Desktop study

4.1 A summary of the results of the desktop study are set out below. Full results, including maps of designated sites within 1km of the site boundary, are found in Appendix 1.

4.2 Relevant species records as listed below are those recorded within 1km during the past 10 years (2007 onwards)

Table 3 Designated sites

Site Name	Designation	Location	Information
Ancient Woodland sites	Restored Ancient woodland	832m	
Wildlife sites (closest being Ffordd Marlborough road).	Wrexham Industrial Estate	40m	This is a series of sites within the industrial estate which includes unmanaged grassland at Bryn Road and on Cefn Park land and ancient broadleaved woodland, Erlas Black Wood. The derelict land known as Cefn Park, on the southern edge of the Industrial Estate, consists of a complex mosaic of scrub, grassland and tall herb. Species-rich grassland occurs where there is rabbit grazing with cowslip, restharrow, yellowwort, common centuary and bird'sfoot trefoil. Other species of interest include dyer's greenweed in among scrub and grass vetchling in rank grassland. Worn paths and motorbike tracks criss-cross the site and many species present such as prickly lettuce, smith's pepperwort and bristly ox-tongue typify disturbed ground. A mosaic of woodland and damp grassland occurs adjacent to the River Clywedog. The woodland is dominated by mature hawthorn with alder and crack willow along the river. The ground flora is sparse but dog's mercury, hart's tongue and male fern do occur. Meadowsweet, great willowherb, and canary reed grass occur in the damper patches. The strip of species-rich grassland beside a ditch on Bryn Road has similar grassland species including the uncommon grass vetchling. False fox sedge, yellow flag and bullrush are a few of the species which occur in the ditch. Erlas Black Wood is dominated by mature oak.

Priority Habitats and species records

4.3 The full list of section 7 habitats and species of principle importance in Wales has been reviewed. See table 4.

Table 4 – Protected and priority species

Designation/Feature	Description
Protected and Priority Species Records from the last 10 years within 1 km	The following species have been recorded within 1 km of the Project Site in the last 10 years: Plants: penny royal (<i>Mentha pulegium</i>) Amphibians: • Common Toad (<i>Bufo bufo</i>) • Great Crested Newt (<i>Triturus cristatus</i>) Invertebrates: • Scarce four-dot-palp (<i>Bembidion quadripustulatum</i>) • Cinnabr (bTyria jacobaeae) • Dingy skipper (<i>Erynnis tages</i>) • Grizzled skipper (<i>Pyrgus malvae</i>) • Latticed heath (<i>Chiasmia clathrata</i>) • Shaded broad-bar (<i>Scotopteryx chenopodiata</i>) • Small heath (<i>Coenonympha pamphilus</i>) • Small phoenix (<i>Ecliptopera silaceata</i>) Reptiles: • Slow worm (<i>Anguis fragilis</i>) • Adder (<i>Vipera berus</i>) Birds: • Black headed gull (<i>Larus ribibundus</i>) • Bullfinch (<i>Pyrrhula pyrrhula</i>) • Cuckoo (<i>Cuculus canorus</i>) • Dunock (<i>Prunella modularis</i>) • Grasshopper warbler (<i>Locustella naevia</i>) • Herring gull (<i>Larus argentatus</i>)

	• House sparrow (<i>Passer domesticus</i>) • Kestrel (<i>Falco tinnunculus</i>) • Lapwing (<i>Vanellus vanellus</i>) • Linnet(<i>Carduelis cannabina</i>) • Reed bunting (<i>Emberiza schoeniclus</i>) • Skylark (<i>Alauda arvensis</i>) • Song thrush (<i>Turdus philomelos</i>) • Spotted flycatcher (<i>Muscicapa striata</i>) • Starling (<i>Sturnus vulgaris</i>) Mammals: • Common Pipistrelle (<i>Pipistrellus pipistrellus</i>) • Hedgehog (<i>Erinaceus europaeus</i>) • Noctule bat(<i>Nyctalis noctua</i>) • Soprano pipistrelle (<i>Pipistrellus pygmaeus</i>)
--	---

4.4 There are 6 records of Otter (*Lutra lutra*) within the 1km search.

4.5 There are no records of Water vole (*Avicola amphibious*) within the 1km buffer of the site.

4.6 The following habitats are on the development site and the immediate adjacent surrounding area.

Table 5 Habitats within the development site

Habitat	Description	Section 7 habitat
Building	There is one building within the development site. The building was assessed for the potential bats utilising.	No
Hedgerow	There is one hedgerow which sits south of the development site. The hedgerow is on the other side of the metal fencing.	Yes
Fences	Metal fencing encloses the development site.	No

Hard standing	There is hard standing within the ownership footprint but not where development is proposed. The hardstanding consists of car park and drive way.	No
Scattered scrub	There is scattered scrub within the development site. It is mainly willow regeneration.	No

Figure 2 - Westward view of the site

Figure 3 - View to South of the site

Figure 4 - View to the west of the site

Figure 5 - View from the northern boundary fence line.

Figure 6 - Ffordd Marlborough Road wildlife site.

Invasive and protected plant species

4.8 No protected (Schedule 8 of the Wildlife & Countryside Act 1981) plant species were observed during the habitat survey

4.9 Himalayan balsam, Giant hogweed, Japanese knotweed and Azolla within 1km.

Connectivity with the wider area

4.10 The site has poor connectivity to the wider area as it is surrounded by dense industrial development including roads. However, Wrexham Industrial Estate does support a variety of species that are under threat. By maintaining habitats via corridors and stepping stone will provide areas for wildlife to thrive.

4.11 The site does contain hedgerows which are classed as good wildlife corridors for many different species and are of particular importance for bats and birds.

Fauna

Amphibians

4.12 The closest pond to the development site is located 300 metres away. The rough grassland and hedgerows do offer opportunity for foraging, connectivity and overwinter habitat for amphibians.

4.13 There is no evidence of amphibians on the proposed development site however, there is a significant population of Great Crested Newts on the Wrexham Industrial Estate, and the site does offer terrestrial habitat.

Reptiles

4.14 There was no evidence of reptiles on site.

Bats

4.15 There are no trees or suitable buildings on site with potential to support roosting bats.

4.16 The hedgerow and dense scrub offers some minor foraging and commuting potential to local bats but this is limited by the lack of connectivity to the wider area. In addition these habitats are to be retained during and post development, with enhancement of these features.

4.17 There are no implications with regard to bat species.

Badger

4.18 Desktop records were returned for badger within 861m of the proposed development site. Evidence of badger such as latrines, snuffle holes, setts etc. was searched for and no evidence of badger activity was found.

Birds

4.19 The habitat on site does offer nesting, foraging and commuting potential for the local bird population. Extensive bird records were returned within 1km, and include and number of Schedule 1 and Section 7 protected species.

Invertebrates

4.20 A large number of protected invertebrates were returned within the desktop records. The site is predominantly rough grassland which currently is un-manged. The enhancement prescriptions will include seeding of wildflowers and hedgerows which will benefit a variety of invertebrates.

Other species

4.21 No other species of concern were identified during the phase 1 habitat survey however the scrub along the site boundary may support a small number of hedgehogs.

5.0 Conclusions

5.1 The proposals for the site include the loss of approximately 80% of the rough grassland on site. The scrub and other boundary vegetation is to be retained during development and enhanced post development. This will include planting of native hedgerow, construction of amphibian hibernacula, seeding of wildflower within the remaining grassland and the provision of bat and bird boxes.

Protected sites and habitats

Amphibians

5.2 There is potential for the site to be used by terrestrial amphibians.

Bats

5.3 There are no trees or buildings on site with potential to support roosting bats.

5.4 The hedgerow and dense scrub offers some minor foraging and commuting potential to local bats but this is limited by a lack of connectivity to the wider area. In addition these habitats are to be retained during development.

5.5 There is minimal implications with regard to bat species.

Badger

5.6 No evidence of badger was found on site. There are no implications with regard to the development and badger.

Birds

5.7 The hedgerow and scrub on site have potential to support nesting birds. A small population of local bird species are likely to use the site for foraging, commuting and nesting.

Other species

5.8 The hedgerows and rough grassland offer foraging, commuting and hibernation potential to local hedgehogs.

6.0 Recommendations

6.1 No impacts on protected sites are predicted from this development due to the small scale of development.

6.2 The site contains habitat suitable to support nesting birds. The rough grassland area required to be disturbed should be undertaken outside the nesting bird season (March - August inclusive). If this is not possible a check must first be undertaken by a suitably qualified ecologist to ensure no nesting birds are present.

6.4 Any excavations on site will not be left exposed at night. Any pipes will also be sealed overnight.

6.5 A suitable experienced ecologist will be present for the immediate preparation of the ground works.

Biodiversity enhancement opportunities

6.7 The scrub and other boundary vegetation is to be retained during development and enhanced post development. The following enhancements have been proposed

- Planting of a native hedgerow on the south, west and northern area. The northern area to connect with Ffordd Marlborough Road Wildlife Site.
- Construction of amphibian hibernacula on the northern edge of the site boundary.
- Seeding of species rich wildflower within the remaining grassland area to benefit grizzled and dingy skippers species in particular.
- Bat and bird boxes to be installed at suitable locations within the site and Ffordd Marlborough road wildlife site. This will be in consultation with the North Wales Wildlife Trust who manage this wildlife site on behalf of Wrexham County Council.
- Hedgerows and grassland to be managed in future years for the benefit of local wildlife. Management prescriptions will be provided by the ecologist.

Mammals	Mustela erminea	Stoat	Carlwm	2016	2016	1
Mammals	Myotis	Myotis Bat Species		2016	2016	2
Mammals	Myotis mystacinus	Whiskered Bat	Ystlum Barfog	1998	1999	2
Mammals	Nyctalus noctula	Noctule Bat	Ystlum Mawr	2016	2016	5
		Pipistrellus Bat				
Mammals	Pipistrellus	Species		2003	2003	1
			Ystlum Lleiaf			
Mammals	Pipistrellus pipistrellus	Common Pipistrelle	Cyffredin	2016	2016	5
			Ystlum Lleiaf			
Mammals	Pipistrellus pygmaeus	Soprano Pipistrelle	Uchelsain	2016	2016	2
Other Invertebrates	Acanthiophilus helianthi			2000	2000	1
Other Invertebrates	Bembidion (Bembidion) quadripustulatum	Scarce Four-dot Pin-palp		2008	2008	2
Other Invertebrates	Bembidion (Notaphus) obliquum			2008	2008	1
Other Invertebrates	Diplapion stolidum			2000	2000	1
Other Invertebrates	Donacia thalassina			2012	2012	1
Other Invertebrates	Grypus equiseti	Horsetail Weevil		2008	2008	1
Other Invertebrates	Neophytobius quadrinodosus			2000	2000	1
		White-barred				
Other Invertebrates	Oxycera morrisii	Soldier		1999	1999	2
Other Invertebrates	Phaonia atriceps			1999	1999	1
Other Invertebrates	Pseudorchestes pratensis			2000	2000	1
Plants	Azolla filiculoides	Water Fern	Rhedynen y Dwr	2013	2013	2
Plants	Calamagrostis epigejos	Wood Small-reed	Corsen Fach y Coed	2011	2011	2
Plants	Cichorium intybus	Chicory	Ysgello	2015	2015	1
		Rough Hawk's-beard				
Plants	Crepis biennis		Gwalchlys Garw	1998	2014	8

Plants	<i>Crocasmia pottsii</i> x <i>aurea</i> = <i>C. x crocosmiiflora</i>	Montbretia	Crib-y-Ceiliog	2014	2014	1
Plants	<i>Dactylorhiza fuchsii</i> x <i>praetermissa</i> = <i>D. x grandis</i>	Marsh-Orchid		2011	2011	1
Plants	<i>Dactylorhiza praetermissa</i>	Southern Marsh-orchid	Tegeirian-y-Gors Deheuol	2016	2016	1
Plants	<i>Fallopia japonica</i>	Japanese Knotweed	Clymog Japan	2011	2015	2
Plants	<i>Genista tinctoria</i>	Dyer's Greenweed	Melynog y Waun	2007	2007	1
Plants	<i>Heracleum mantegazzianum</i>	Giant Hogweed	Efwr Enfawr	2011	2011	1
Plants	<i>Impatiens glandulifera</i>	Himalayan Balsam	Jac y Neidiwr	2011	2016	3
Plants	<i>Lathyrus nissolia</i>	Grass Vetchling	Ytbysen Feinddail	2009	2016	5
Plants	<i>Medicago arabica</i>	Spotted Medick	Maglys Brith	2016	2016	1
Plants	<i>Mentha arvensis</i>	Corn Mint	Mintys yr Âr	2016	2016	1
Plants	<i>Mentha pulegium</i>	Pennyroyal	Brymlys	2014	2014	1
Plants	<i>Ononis spinosa</i>	Spiny Restharrow	Tagaradr Pigog	2013	2016	4
Plants	<i>Ophioglossum vulgatum</i>	Adder's-tongue	Tafod y Neidr	2010	2010	1
Plants	<i>Petasites hybridus</i>	Butterbur	Alan Mawr	2011	2011	2
Plants	<i>Polemonium caeruleum</i>	Jacob's-ladder	Ysgol Jacob	2011	2011	1
Plants	<i>Rorippa amphibia</i>	Great Yellow-cress	Berwr Melyn Mawr	2016	2016	1
Plants	<i>Salix viminalis</i> x <i>cinerea</i> = <i>S. x holosericea</i>	Silky-leaved Osier		2011	2011	2
Plants	<i>Sedum album</i>	White Stonecrop	Briweg Wen	2016	2016	2
Plants	<i>Silaum silaus</i>	Pepper-saxifrage	Ffenigl yr Hwch	2009	2014	6
Plants	<i>Sinapis arvensis</i>	Charlock	Mwstard Gwyllt	2011	2014	2
Reptiles and Amphibians	<i>Anguis fragilis</i>	Slow-worm	Neidr Ddefaid	1999	2009	3
Reptiles and Amphibians	<i>Bufo bufo</i>	Common Toad	Llyffant Dafadennog	2005	2018	13
Reptiles and Amphibians	<i>Lissotriton helveticus</i>	Palmate Newt	Madfall Ddwr Balfog Madfall Ddwr	2018	2018	1
Reptiles and Amphibians	<i>Lissotriton vulgaris</i>	Smooth Newt	Gyffredin	1992	2018	102
Reptiles and Amphibians	<i>Rana temporaria</i>	Common Frog	Llyffant Melyn	2005	2018	13
Reptiles and Amphibians	<i>Triturus cristatus</i>	Great Crested Newt	Madfall Ddwr Gribog	1992	2018	378

Reptiles and Amphibians	Vipera berus	Adder	Gwiber	1999	2009	3
