Subject: RE: Planning Application P/2022/0294 - Case Officer SEH

Hi Nick,

Further to your email, we have asked and got confirmation on the material/colour. As follows:

The silo is made from aluminium grade 5754, and it is left as it comes it is not polished or finished in anyway. It is a low-reflection, very low roughness press-rolled finish comparable to a 2b finish (Please see attached picture), and get duller as it weathers in.

Please let us know if the information specified from the manufacturer is acceptable.

Many thanks,

Alberto Lavela
