Dear Sir/Madam,

PROPOSAL: SINGLE STOREY REAR EXTENSION AND ERECTION OF OUTBUILDING

LOCATION: MOUNT ALYN CROFT, CROESHOWELL HILL, BURTON, ROSSETT, LL12 0AA

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 5th April 2022.

We have no objection to the proposed development as submitted and provide the following advice.

Protected Sites and Foul Drainage

We note the application, as submitted, proposes a domestic extension e.g. garden office and single storey extension to the property, i.e. an extension to a dwelling house comprising a single household. Please note, we do not consider that a potential change in the number of inhabitants of the property should in itself justify the triggering of likely significant effects on a European Site, unless there is a material change of use connected to or arising from the change in occupancy or if the use resulting from the change in occupancy cannot be said to be incidental to the enjoyment of the dwelling house - this will be a planning judgment for your authority to make. Ultimately it is a matter for you, as Competent Authority, to satisfy yourselves that the proposed development will not result in a significant effect on the SAC. Therefore, should your Authority conclude that the proposal is likely to have a significant effect on the River Dee and Bala Lake SAC, please consult us on your appropriate assessment under Regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended).

If you as the LPA consider this application is not proposed domestic extension then please reconsult us.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

Advice to Developer

Landfill

According to our records the proposed development site is located near to land that is, or has been, used for the deposition of waste material. We would therefore advise you to consult with the local authority's Environmental Health and Building Control Departments, as they may hold detailed records, and may wish to make appropriate recommendations in respect of landfill gas investigation/remedial work. The developers should be made aware of the existence of the landfill site(s) so that they can decide whether or not to make their own investigations into the presence of landfill gas. It should also be noted that Waste Management Paper 27 states "It has been found that many sites which have taken only supposedly 'inert' waste have produced gas.

If you have any queries on the above, please do not hesitate to contact us.

Yours faithfully

Ruth Prichard
